Electronic Commerce Efraim Turban, David King, Jae Kyu Lee, Ting-Peng Liang, Deborah C. Turban, 2015-01-29

Throughout the book theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition. Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce related company. The authors provide website resources, numerous exercises and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally, extensive, vivid examples from large corporations, small businesses from different industries and services, governments and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification and the innovative ways corporations are using EC in their operations. In this edition, previous editions published by Pearson Prentice Hall, the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations and mobility.

Number Savvy George Sciadas, 2022-12-16

This book is written for the love of numbers. It tells their story, shows how they were invented and used to quantify our world, and explains what quantitative data mean for our lives. It aspires to contribute to overall numeracy through a tour de force presentation of the production, use and evolution of data. Understanding our physical world, our economies and our societies through quantification has been a persistent feature of human evolution. This book starts with a narrative on why and how our ancestors were driven to the invention of number, which is then traced to the eventual arrival at our number system. This is

followed by a discussion of how numbers were used for counting how they enabled the measurement of physical quantities and how they led to the estimation of man made and abstract notions in the socio economic domain As data don t fall like manna from the sky a unique feature of this book is that it explains from a teacher s perspective how they re really conceived in our minds how they re actually produced from individual observations and how this defines their meaning and interpretation It discusses the significance of standards the use of taxonomies and clarifies a series of misconceptions regarding the making of data The book then describes the switch to a new research paradigm and its implications highlights the arrival of microdata illustrates analytical uses of data and closes with a look at the future of data and our own role in it
