Learning Begins Andrew C. Watson,2017-03-08 Learning Begins written by a teacher for teachers translates current brain research into practical

classroom strategies Because students learn with their brains it simply makes sense for teachers to explore educational psychology and neuroscience And yet information in these fields can be daunting and contradictory Worse still few researchers can clearly explain the specific classroom uses of their remarkable discoveries Learning Begins both explains this research and makes it useful for teachers and administrators Part I investigates the science of working memory a cognitive capacity essential to all school work When teachers recognize the many classroom perils that can overwhelm working memory they can use research aligned strategies to protect it and thereby promote student learning Part II reveals the complexities of student attention By understanding the three neural sub processes that create attention teachers can structure their classrooms and their lessons to help students focus on and understand new material Written in a lively and approachable voice based on years of classroom experience and a decade of scientific study Learning Begins makes educational psychology and neuroscience clear and useful in schools and classrooms **Best Practices in Mental**
