The Effects of Artificial Intelligence on Business Performance Clint Amaning,James

Adjei,Agyei Rita Ohenebaah,Adom Bismark Kofi,2024-08-05 Research Paper postgraduate from the year 2024 in the subject Computer Sciences Artificial Intelligence grade 1 Kwame Nkrumah University of Science and Technology UNIVERSITY course BUSINESS ADMINISTRATION INTERNATIONAL BUSINESS language English abstract This thesis examines the influence of Artificial Intelligence AI on company performance as well as the problems that Ghanaian organizations confront while adopting and deploying AI technologies The study uncovers useful insights into the perceptions of AI s function in corporate operations and the difficulties encountered during its integration through a comprehensive poll of 104 participants

According to the demographic research the majority of respondents were males between the ages of 21 and 40 with a bachelor's degree. The study's first objective focusing on the role of AI on business performance reveals a robust positive correlation between AI adoption and business performance. Participants unanimously acknowledge AI's transformative effects on various aspects of business operations such as enhancing efficiency, decision making, innovation, customer satisfaction, error reduction, competitive advantage, and personalization of offerings. However, the study's second objective sheds light on the challenges and barriers hindering the seamless adoption of AI technologies. Respondents identify key challenges including a lack of skilled AI professionals, limited awareness, financial constraints, data privacy concerns, absence of a clear AI strategy, and resistance to change. These challenges indicate the need for targeted interventions to overcome obstacles in integrating AI effectively within Ghanaian enterprises. *AI Trends*, 1987 A comprehensive annual report on the artificial intelligence industry.

Radiopharmaceutical Extravasations: Impact on Patients, Providers, Payers, Radiation Safety, Research, and Regulations

Medhat M. Osman, David Townsend, Ronald Keith Lattanze, 2025-12-19

Radiopharmaceutical extravasations have been present since the beginning of nuclear medicine. While there has been a significant increase in interest over the past five years regarding these extravasations, there is minimal understanding of the issue. Furthermore, there is little published information on radiopharmaceutical extravasations compared to chemotherapy, contrast CT and other pharmaceutical extravasations. As the energy emissions of routinely administered diagnostic radiopharmaceuticals have and continue to evolve in nuclear medicine over the past five decades and as more and more radiotherapeutics enter the market, there is a need to educate all stakeholders on this important topic. Most nuclear medicine facilities do not proactively monitor the quality of their radiopharmaceutical administrations. Because radiopharmaceutical administrations usually involve small volumes and do not cause a burning sensation and because injection sites are not routinely included in the imaging field of view, many extravasations can go unnoticed. Since large diagnostic radiopharmaceutical extravasations and most radiotherapeutic extravasations can result in high absorbed doses to healthy tissue and can compromise the intended nuclear medicine procedure, our goal is to increase awareness of this topic. As nuclear medicine facilities increase their understanding of this pernicious administration error and take appropriate steps to prevent extravasations, patient care will improve. *IETE Technical Review*, 1989 *CIPS Review* Canadian Information Processing Society, 1987 *AI Magazine*, 1999 *The Public-access Computer Systems Review*, 1993
