My Maple Tree Kevin D Finson, 2022-04-04 Kevin wrote this book about a maple tree in the yard of his home The tree started when a seed fell into a flowerpot on his daughter's balcony Soon the seed sprouted and grew into a small sapling Kevin and his daughter took the sapling and transplanted it to Kevin's front yard where they nurtured it and helped it grow into a strong small tree Years later the tree had grown large and provided wonderful shade for the house and showered the area with its own seeds to populate the area with even more maple trees that everyone could enjoy My Maple Tree takes the reader through the changes a maple tree makes throughout the four seasons This is the story of the life cycle of a maple tree In the spring a maple tree seed sprouts takes root and then reaches its sapling toward the sky The sapling grows through the summer and eventually becomes a mature tree with a full canopy of green leaves In the autumn the maple tree's leaves become brilliant scarlet and soon begin to fall The tree is bare in the winter snow but revives the next spring as it brings forth new green leaves and then seeds to begin the life of new maple trees The book illustrates these changes in the life of the maple tree using actual colored photographs and rhyme narrative that speaks to what is being shown in each photograph My Maple Tree can easily be paired with other books about other kinds of trees or plants as well as books about persons who have interacted with trees
