A History of Health & Fitness: Implications for Policy Today Roy J. Shephard, 2017-09-18 This book provides a unique and succinct account of the history of health and fitness responding to the growing recognition of physicians, policy makers and the general public that exercise is the most potent form of medicine available to humankind. Individual chapters present information extending from the earliest reaches of human history to the present day arranged in the form of 30 thematic essays covering topics from the supposed idyll of the hunter gatherer lifestyle and its posited health benefits to the evolution of health professionals and the possible contribution of the Olympic movement to health and fitness in our current society. Learning objectives are set for each topic and although technical language is avoided as far as possible a thorough glossary explains any specialized terms that are introduced in each chapter. The critical thinking of the reader is stimulated by a range of questions arising from the text context and each chapter concludes with a brief discussion of some of the more important implications for public policies on health and fitness today and into the future. The material will be of particular interest to graduate and undergraduate students in public health, health promotion, health policy, kinesiology, physical education but will be of interest also to many studying medicine, history and sociology.

Michigan Living, 1993 *America on Foot* Kerry Segrave, 2006-03-15 Hippocrates, one of history's earliest known physicians, once asserted Walking is man's best medicine. Over the last three centuries people have endorsed walking for a variety of reasons, health among them. Before the 1700s people walked as an essential part of their lifestyle. With the coming of the transportation revolution and the advent of such conveyances as horse drawn coaches, railways and automobiles, walking became something that was done increasingly out of choice rather than necessity. England's fashionable society engaged in afternoon promenades as a stylish fad. While America's

vast distances and sparse settlements made this activity impractical Americans nevertheless took to walking in other ways including engaging in long distance walking competitions complete with spectators and prize money Thus for most of the twentieth century the activity of walking was much more than a means of transportation Beginning with the history of walking as a social activity the book discusses the various issues which have affected walkers including increased automobile traffic the attention of the marketing industry and pedestrian regulations The work examines the contemplative psychological and observational qualities of walking as well as famous personalities including Leonardo da Vinci William Shakespeare John Keats and John James Audubon who endorsed these intellectual qualifications During the 1970s fitness boom walking was reinvented yet again becoming an activity of numbers and equations as participants fought to maximize health benefits The book concludes with a legal analysis of pedestrianism as it relates to sharing space with the automobile *Popular Science*
