Delaney, Rosalind Dixon, 2018 Constitutional courts around the world play an increasingly central role in day-to-day democratic governance. Yet scholars have only recently begun to develop the interdisciplinary analysis needed to understand this shift in the relationship of constitutional law to politics. This edited volume brings together the leading scholars of constitutional law and politics to provide a comprehensive overview of judicial review, covering theories of its creation, mechanisms of its constraint, and its comparative applications, including theories of interpretation and doctrinal developments. This book serves as a single point of entry for legal scholars and practitioners interested in understanding the field of comparative judicial review in its broader political and social context.     *The Burial Record of Prehistoric Liangshan in Southwest China* Anke Hein, 2016-12-13 This book proposes a new model and scheme of analysis for complex burial material and applies it to the prehistoric archaeological record of the Liangshan region in Southwest China, that other archaeologists have commonly given a wide berth regarding it as too patchy, too inhomogeneous, and overall too unwieldy to work with. The model treats burials as composite objects, considering the various elements separately in their respective life histories. The application of this approach to the rich and diverse archaeological record of the Liangshan region serves as a test of this new form of analysis. This volume thus pursues two main aims to advance the

understanding of the archaeology of the immediate study area which has been little examined and to present and test a new scheme of analysis that can be applied to other bodies of material      *Analysis of the first book of Samuel* Lewis Hughes,1885
