**Public Finance Management** Sarah Jane Squire, Ivor Beazley, 2016-11-14 In countries such as the United Kingdom the need to manage finances in a professional manner has been hampered by the severe fiscal constraints of the 2008 financial crisis. These pressures are likely to persist in the long term as a result of an aging population and rising public expectations of the quality of public services. Whereas much attention has been paid to technical reforms to improve budgeting, expenditure control, accounting and auditing, less attention has been given to the process of developing skilled financial managers whose expertise is key to sustained improvement in the management of public finances. Successive governments in the United Kingdom have recognized the need to strengthen professionalism in financial management but the financial crisis gave an additional impetus for change. This change has been reflected in policy statements, changes in recruitment and human resource management practices and the development of professional networks in accounting, audit, procurement and project management. *Increasing Professionalism in Public Finance Management: A Case Study of the United Kingdom* describes the journey from a civil service where generalist skills were overwhelmingly preferred toward one where professional technical skills in finance are recognized and valued. This book represents one of a number of country case studies aimed at sharing information about alternative paths and models to help developing countries seeking to strengthen public financial management skills on a long term sustainable basis. This book will be of importance to public policy makers and public practitioners looking for ways to improve the quality of public sector management and to a range of professional finance management bodies looking to strengthen their relevance to the government sector.     *British Qualifications 2012* Kogan Page Ltd, 2011-12-03
