

UNIT 3: SUBTRACTION**LESSON 3.19****Balanced Equations: Addition and Subtraction**

Solve to create balanced addition and subtraction equations within 20.

- Lesson 3.19 Teaching Slides
- Lesson 3.19 Copies
- Dry-Erase Pockets
- Dry-Erase Supplies
- Dice
- Balance Scale and Cubes (optional)

Think About It: Show students the Think About It slide. Give students plenty of silent thinking time for them to think of a number story that could be told about the picture shown. Students can make up any number story using the images on the slide. Allow students to share and have the class solve some of the number stories.

Review balancing equations in addition and also in subtraction. Use the teaching to slides to explain that today students will be balancing equations in the same way, but using both addition and subtraction. Give each student a Balanced Equations mat in a dry-erase pocket (or laminated) and a dry-erase marker. Work through the teaching slides together to find the total for the number sentence that is complete. Use that total to make the other side equal and fill in the missing number. The totals go beneath the number sentences on the balance scale.

Blizzard Rescue Race: Print the Blizzard Rescue Race gameboard in color or black/white for each set of partners. Students will choose a column and take turns rolling a die. They will use the number that they roll to fill a number sentence in their column to make balanced equations. They will color the box when they complete the number sentence. If they cannot use the number they roll, they lose a turn. The first player to fill up all of their boxes wins the rescue race!

Balancing Sled Dogs: Students will cut out the dog equations from the bottom of the page. Then, they will glue each dog next to the sled that makes balanced equations.

Students will demonstrate their understanding of balanced equations by solving for the missing part in each problem.

EXTENSION: Use a balance scale with connecting cubes and give students two equations to solve with one equation having a missing part. Walk them through modeling one equation on one side of the scale and how to make the equations equal to balance the scale.

VISION: Refer to Lucky to Learn Math Grade 2, Unit 2 for extension activities involving balanced subtraction.

The Mathematics Lesson-Planning Handbook, Grades K-2 Beth McCord Kobett, Ruth Harbin Miles, Lois A. Williams, 2018-02-09 This book brings together the best of Visible Learning and the teaching of mathematics. The chapters on learning intentions, success criteria, misconceptions, formative evaluation, and knowing thy impact are stunning. Rich in exemplars grounded in research about practice and with the right balance about the surface and deep learning in math, it's a great go-to book for all who teach mathematics. John Hattie Laureate Professor, Deputy Dean of MGSE, Director of the Melbourne Education Research Institute, Melbourne Graduate School of Education. Your blueprint to planning K-2 math lessons for maximum impact and understanding. Not sure of tomorrow morning's lesson plan? Or maybe you feel it isn't tailored enough for your students' needs? What do you do? For that and more help is here. **The Mathematics Lesson Planning Handbook, Grades K-2** Your Blueprint for Building Cohesive Lessons guides teachers step by step through the decision-making process of planning K-2 math lessons that are purposeful, rigorous, and coherent. Instructional experts Beth McCord, Kobett, Ruth Harbin Miles, and Lois A. Williams streamline and deepen the lesson planning process, showing teachers how to access students' complex needs, clarify learning intentions, and select tasks that will best lead to student understanding of mathematical concepts and skills. Along the way, teachers create an individualized blueprint for planning K-2 math lessons for maximum student learning. The lesson planning process guides teachers to identify the mathematical content language and social learning intentions for a lesson or unit and connect goals to success criteria. Determine the purpose of a math lesson you're planning by distinguishing between conceptual understanding, procedural fluency, and transfer. Select worthwhile tasks and materials that make the best use of representations, manipulatives, and other instructional tools and resources. Choose the format of your lesson using reasoning and number routines, games, whole class discussion, and pairs or small group work. Anticipate student misconceptions and evaluate understanding using a variety of formative assessment techniques. Decide how you'll launch your lesson, facilitate questioning, encourage productive struggle, and close your lesson. Included is a lesson planning template and examples from kindergarten, first, and second grade classrooms. Chapter by chapter, the decision-making strategies empower teachers to plan math lessons strategically to teach with intention and confidence and to build an exceptional foundation in math for all students.
