just as analysis of the mind without acquaintance with natural phenomena will not suffice to grasp the perceivable world Only familiarity with phenomena combined with mental analysis will lead to additional knowledge The citation from Genesis Chapter 30 is part of an unusual story It tells how Jacob received as payment for his service to Laban the bulk of Laban s herds By agreement Jacob was to receive only the newborn speckled and spotted goats and the newborn brown sheep that differed completely from their parents Did Jacob know that there was instability transposable elements in the pigmentation of Laban s herd It is reasonable to assume that Jacob combined his keen observation with analysis of his mind in order to predict the outcome most of the newborns were indeed speckled spotted or brown **National Library of Medicine**
