**Theoretical Investigations** Gerry Stahl, 2021-04-23 Computers have transformed how we think, discuss and learn as individuals in groups within cultures and globally. However, social media are problematic, fostering flaming culture wars and fake news. This volume presents an alternative paradigm for computer support of group thinking, collaborative learning and joint knowledge construction. This requires expanding concepts of cognition to collectivities like collaborative groups of networked students. *Theoretical Investigations* explores the conditions for group cognition, supplying a philosophical foundation for new models of pedagogy and methods to analyze group interaction. Twenty-five self-contained investigations document progress in research on computer-supported collaborative learning (CSCL) both in Stahl's own research and during the first decade of the CSCL journal. The volume begins with two new reflections on the vision and theory that result from this research. Representing both ethnomethodological and social constructivist research paradigms, the investigations within this volume comprise a selection of seminal and influential articles and critical commentaries that contribute to an understanding of concepts and themes central to the CSCL field. The book elaborates an innovative theory of group cognition and substantiates the pedagogical potential of CSCL. *Theoretical Investigations: Philosophical Foundations of Group Cognition* is essential as a graduate text for courses in educational theory, instructional design, learning and networked technologies. The investigations will also appeal to researchers and practitioners in those areas. [Overview and Autobiographical Essays](#)

Gerry Stahl, 2016-01-27 The current volume is intended to provide an overview of the eLibrary and some documentation of my life as the author of these texts. [Socializing Intelligence Through Academic Talk and Dialogue](#) Lauren Resnick, Christa Asterhan, Sherice Clarke, 2015-04-19 *Socializing Intelligence Through Academic Talk and Dialogue* focuses on a fast-growing topic in education research. Over the course of 34 chapters, the contributors discuss theories and case studies that shed light on the effects of dialogic participation in and outside the classroom. This rich interdisciplinary endeavor will appeal to scholars and researchers in education and many related disciplines, including learning and cognitive sciences, educational psychology, instructional science and linguistics, as well as to teachers, curriculum designers and educational policy makers.

**The Computer Supported Collaborative Learning (CSCL) Conference 2013, Volume 1** ISLS, 2014-04-23 *The Computer Supported Collaborative Learning (CSCL) Conference 2013 proceedings Volume 1* **Studying Virtual Math Teams (pre-publication Version)** Gerry Stahl, 2016-01-28 This book presents a coherent research agenda that has been pursued by the author and his research group. The book opens with descriptions of the project and its methodology, as well as situating this research in the past and present context of the CSCL research field. The core research team then presents five concrete analyses of group interactions in different phases of the Virtual Math Teams research project. These chapters are followed by several studies by international collaborators discussing the group discourse, the software affordances and alternative representations of the interaction, all using data from the VMT project. The concluding chapters address

implications for the theory of group cognition and for the methodology of the learning sciences      **Essays in Online Mathematics Interaction** Gerry Stahl, 2015-10-06 These are case studies of student teams using VMT to work on problems in the mathematical domain of combinatorics The version of VMT used here included a generic whiteboard for sketching graphical representations Data from these sessions was analyzed by a number of researchers in addition to the VMT project members The essays in this volume were co authored with close colleagues      **Troubles of Understanding in Virtual Math Teams** Nan Zhou, Gerry Stahl, 2010
