- 2 Creating a Custom Post TypeThis in my humble opinion is one of the best additions to WordPress in recent releases With the ability to make your own content types each with its own theme template you can take WordPress from being a CMS only limited to blog posts and pages to a CMS that can manage any kind of content you can imagine In this book we ll be creating a business listing type which will allow us to create a business directory
- 3 Theme Options and WidgetsWith WordPress you can make a theme your own by adding a theme options page and custom widgets In this section we ll make it very easy for people who use our themes to add their own cus tomizations without delving into the code or creating a child theme
- 4 Creating a PluginOne of the most powerful facets of WordPress is the fact that it s pluggable We can add func tionality to our installation of WordPress without changing the core WordPress files There are vast directories of both free and premium plugins available that vastly expand the capabilities of WordPress In this final section of this book we will build our own plugin
