Buonocore, Rodolfo Bracci, Michael Weindling, 2011-12-01 This new textbook wants to offer to neonatologists and pediatricians a modern and complete view of the various problems and aspects of neonatology currently one of the most complex and advanced fields of pediatrics The first chapters will be dedicated to the epidemiology of neonatal mortality and morbidity and to the conditions responsible for neonatal risk A section will be devoted to organizational problems of hospitals and home services for efficient modern neonatal and infant care Particular attention will be paid to neonatal care medico legal questions examination of newborns and current availability of laboratory facilities and instrumentation for identification of perinatal abnormalities Neonatal nutritional problems will also be examined outlining current knowledge of the needs of sick and healthy babies Conditions jeopardizing fetal health such as diabetes maternal drug abuse and smoking will be discussed New advances in neonatal pharmacology will be extensively examined Various diseases of the neonate involving lungs heart gastrointestinal tract blood immune system endocrine system and kidneys will be also expounded in special chapters Fetal and neonatal infections will be extensively discussed Fetal and neonatal neurological abnormalities will be discussed by highly specialized authors There will be chapters on neonatal ophthalmology dermatology and orthopedics Each chapter has been written by a well recognized international expert in his or her field As the opinion leader in their field the Author is responsible for giving the most up to date information in terms of what is known what is still being researched and what has become evidence based medicine Underlying causes and mechanisms of neonatal diseases will be presented in an immediate form The use of summaries tables and accurately selected guidelines or recommendations that will accompany the text will supply quick references and instant solutions to the concerned neonatologists during their daily practice HADI NEONATAL CLINIC COMPANION DR. ABDELHADI ABDELGABBAR ABDELHADI, The neonatal clinic is an enjoyable yet challenging experience for the beginners as well as the experts The execution of a thorough assessment is easier in the setting of the Neonatal Unit environment where multiple players in the team are always there to plug any gaps you may have missed Furthermore the context of the clinic is totally different from the scene in NICU The conditions presenting to the clinic may bear no relevance to the usual medical problems encountered while the newborn is still in the hospital Furthermore many neonatal conditions come to light only after discharge while others require different approach as the acute conditions ramifications are endless The parents are usually well prepared to explore all the aspects of the presenting condition They expect to leave the clinic with satisfactory explanations and amicable solutions Small issues may cause them great anxiety if the clinician is not able to reassure them factually confidently and honestly They do not expect or imagine the condition may also be new to the clinician Systemic approach always pays dividends A thorough history is the key to unlock most issues This requires a good listener sound background knowledge and experience to extract the relevant facts during the short time slot available in the clinic The assessment is always deficient if the examination is hurried and limited to a targeted system Head to toe front and back examinations are mandatory Tailored investigation if necessary complete the
