Inclusion and Diversity in Education: Inclusive pedagogy in curricula and classrooms Peter Hick, Gary Thomas, 2009 This 4 volume set brings together seminal articles and key writings on the theme of inclusion and diversity in education. The collection takes disability and special educational need as a starting point from which to develop a broader focus on a range of themes relating to learners who may be marginalized from educational opportunities. This includes for example members of minority ethnic communities, students excluded from schools or who are looked after in public care and other dimensions of exclusion arising from social class, gender or sexuality. The starting point for understanding inclusive education lies in social justice perspectives and this forms the basis for the first volume. Volumes two and three focus on research aimed at developing more inclusive practices both at the levels of schools and school systems and at the levels of inclusive pedagogy enacted in the classroom and through the curriculum. Volume four reflects the range of voices in research on inclusive education drawing on traditionally marginalized voices and those of learners in particular. Three cross cutting themes are represented across all four volumes a chronological approach showing how key concepts and perspectives have developed in each area of the literature identified groups of learners developing more nuanced readings of how processes of exclusion and inclusion intersect dimensions such as disability, class and race and contexts for learning such as urban education and global or comparative perspectives
