Working With Bereaved People 1e:

A Textbook of Children's and Young People's Nursing - E-Book Edward Alan Glasper, James Richardson, Duncan Randall, 2021-03-19 This innovative textbook provides a concise and accessible guide for undergraduate students specializing in children and young people's nursing in the UK and further afield. Each chapter has been fully updated to reflect current knowledge and practice. The wide range of topics covered includes all the essentials such as contemporary child health policy and legal issues, knowledge and skills for practice and caring for children with special needs. Students will learn how to recognize the deteriorating child, use procedural play and distraction and consider the mental health of children and young people. A Textbook of Children's and Young People's Nursing is written by multidisciplinary experts rooted in child-centred healthcare within a family context and draws upon best contemporary practice. It is an invaluable resource that will help nursing students provide effective evidence-based care. Key points summary boxes and clearly defined aims, objectives and learning outcomes to support learning. Conversation boxes to enliven the text. Patient scenarios to relate theory to practice. New chapters on skin health and the use of therapeutic play. Suggestions for seminar discussion topics to help teachers. Resource lists and online resources for further study or research. Online slides to complement chapters within book.

Sensory Awareness and Social Work Michelle Evans, Andrew Whittaker, 2010-05-11 Understanding sensory needs is fundamental for social work and care management practice. Social workers are trained to reflect on their own practice, make useful application of theory and promote anti-discriminatory practice at all times. This book will assist students in identifying people who have a sensory need and enable them to have the knowledge, skills and values to address this. Designed specifically to encourage students to build confidence and develop skills essential to best practice, this book is specifically structured to address all aspects of sensory need. *Death, Society and Human Experience (1-download)* Robert Kastenbaum, 2015-07-22 Providing an understanding of the relationship with death both as an individual and as a member of society. This book is intended to contribute to your understanding of your relationship with death both as an individual and as a member of society. Kastenbaum shows how individual and societal attitudes influence both how and when we die and how we live and deal with the knowledge of death and loss. Robert Kastenbaum is a renowned scholar who developed one of the world's first death education courses and introduced the first text for this market. This landmark text draws on contributions from the social and behavioral sciences as well as the humanities such as history, religion, philosophy, literature and the arts to provide thorough coverage of understanding death and the dying process. Learning Goals: Upon completing this book, readers should be able to: Understand the relationship with death both as an individual and as a member of society. See how social forces and events affect the length of our lives, how we grieve and how we die. Learn how dying people are perceived and treated in our society and what can be done to provide the best possible care. Master an understanding of continuing developments and challenges to hospice/palliative care. Understand what is becoming of faith and doubt about an afterlife.

Psychology and Sociology Applied to Medicine E-Book Beth Alder, Edwin van Teijlingen, Michael Porter, 2011-11-29 This textbook in the Illustrated Colour Text series offers an integrated treatment of sociology and psychology for medical students. It is presented in a much more colourful and graphic format than is usual for books on these two subjects. This integration reflects the tendency to teach these two subjects together as behavioural science with an increased stress on the place of medicine in society and on illness as a product of psychological and social circumstances rather than merely a biological phenomenon. The book reflects these trends and has been successful and popular with students. An integrated treatment of psychology and sociology for medical students in line with the trend towards teaching these subjects as behavioural sciences. Use of case studies and Stop Think boxes encourages critical thinking and discussion. Graphic Illustrated Colour Text presentation style enlivens a subject which most medical students are not keen on. This third edition contains a new introduction on the importance and key features of the biopsychosocial model and additional double page spreads on International Health and Rural Health.

Coping With Loss Susan Nolen-Hoeksema, Judith Larson, Judith M. Larson, 2013-01-11 Coping With Loss describes the many ways in which people cope with the death of someone they love. Most earlier books on bereavement have fallen into two categories: distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies. Each category is valuable but has tended to serve a narrow group of readers: practitioners with particular theoretical orientations or researchers in quest of the latest findings. Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention, this book is different. The authors weave together the strands of theory, research and clinical wisdom into a seamless and readable narrative. While they discuss previous work, they also present new data never before published from one of the largest studies of bereaved people ever conducted: the Bereavement Coping Project. Unlike most studies to date which focused on only one type of bereaved group, usually widows or widowers, the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the death. The groups included those who had lost a spouse, a parent, an adult sibling or a child, and those who had lost their significant other to cancer or cardiovascular disease, on one hand, as opposed to the stigmatized disease of AIDS on the other. The book begins with a critical overview of theories of bereavement; succeeding chapters explore in depth the impact of specific types of loss, the impact of particular coping strategies on recovery, the impact of social supports and religion, and the special cases of children and of people who seem to grow and change for the better after a loss. A final chapter considers implications for intervention with bereaved people. Each chapter is richly illuminated with real life examples throughout and ends with a section called Voices in which bereaved people describe their various attempts to cope in their own words. Insightful and informative.

Essentials of Psychiatric Mental Health Nursing - E-Book Elizabeth M. Varcarolis, Chyllia D Fosbre, 2020-07-16 A 2017 AJN Book of the Year Award winner. Essentials of Psychiatric Mental Health Nursing: A Communication Approach to Evidence

Based Care 4th Edition offers the perfect balance of essential nursing interventions and clinical content. It incorporates a reader friendly style and an emphasis on therapeutic communication and evidence based practice. Perfect for shorter psychiatric nursing courses, this streamlined psychiatric text includes need to know information and key DSM 5 content you need to pass your course and prepare for the NCLEX. A neurobiology of the brain teaching tool provides a visual depiction of how the disorder affects brain function and what drugs are used to treat it. Additionally, this new edition includes Giddens Concept boxes, Integrative Care boxes, updated clinical disorders, chapters and new use of nursing diagnosis language, International Classification for Nursing Practice (ICNP) which smooths your transition into practice as this is a common language shared with many electronic health record documentation systems. Neurobiology of the brain feature provides a visual depiction on how the disorder affects brain function and what drugs are used to treat the disorder. Applying Evidence Based Practice boxes throughout the clinical chapters pose a question, walk you through the process of gathering evidence based data from a variety of sources and present a plan of care based on the evidence. Vignettes describing psychiatric patients and their disorders add more practical application to the chapter material. DSM 5 diagnostic criteria identify medical diagnostic criteria for most major disorders. Applying Critical Judgment introduces clinical situations in psychiatric nursing at the end of all chapters with thought provoking questions that engage critical thinking. NEW Integrative Care boxes address alternative therapies to treat psychiatric illnesses. NEW Giddens Concept boxes at the beginning of each chapter tie to the topics discussed in that chapter. UPDATED Clinical disorders chapters such as Schizophrenia, Bipolar Disorders and Somatoform Disorders and many others reflect the latest evidence based research and practice. NEW ICNP nursing diagnosis language smooths your transition into practice as this is a common language shared with many electronic health record documentation systems. UPDATED Cultural Considerations sections include more updated and relevant material whenever possible in the clinical chapters and address cultural considerations with various patients and appropriate care.

Aspects of Social Work and Palliative Care Jonathan Parker, 2005. This text provides a wide range of central issues in palliative care, social work practice and brings together a number of authors with expertise in their particular areas of practice.
