## **Workplace Conflicts Effects Performance Teachers:**

*Workplace Conflicts and Their Effects on the Performance of Teachers* Mwangi Mary, Kotut Sharon, Nderitu Rose, 2015-12-03 Workplace conflict is part of an organization that cannot be wished away because the human capital is heterogeneous in nature. However, if not well managed, it affects the employee performance. Despite being born and brought up in a society where, like other communities world wide, Mary the author and Sharon and Rose her co authors who are all PhD students in Kenyan Universities and all trained teachers in their bachelors degree have developed a keen interest on how the presence of conflict whose effect is greatly ignored especially in the workplace has had a great influence on the employee performance and especially on the teacher who in the Kenyan setting has always been on and off work as a result of unending industrial unrest and this has spilled down to various types of workplace conflicts that generally negatively have an effect on the teacher performance in Secondary schools in Nyeri central District a sub district in the Great Nyeri County IN Kenya. *Resources in Education*, 1993. *The Interplay of Stress, Health, and Well-being: Unraveling the Psychological and Physiological Processes - volume II* Edgar Galindo, Adelinda Araujo Candeias, Mariola Bidzan, Konrad Reschke, Marcus Stueck, 2025-05-13 This Research Topic is the second volume of Research Topic The Interplay of Stress Health and Well being Unraveling the Psychological and Physiological Processes. theory respondents rank styles of resolving conflict depending upon the degree of concern for retaining relationships versus the degree of concern for meeting goals However there is great disparity among study results In this study meta analytic techniques were used to provide a clearer overall picture of conflict resolution rankings Analyses were conducted of published and unpublished research results with statistical measures of conflict resolution style preferences focusing on the variables of worker minority status including ethnicity gender and foreign national and organizational role status of referent group including superior subordinate and peer The results of the meta analyses were 1 Ethnicity and foreign national insufficient studies for overall meta analysis tentative results using one instrument showed Asian ethnicities highest on avoiding Middle Easterners highest on compromising Hispanic Americans highest on accommodating African Americans lowest on avoiding and European Americans highest on problem solving 2 Gender meta analysis indicated females were significantly more likely to use accommodating and compromising males significantly preferred forcing 3 Organizational role meta analysis indicated respondents used avoiding significantly more with peers than with subordinates and compromising style less with subordinates than superiors Focus group results corroborated the results in general but there was strong consensus about the need to regard each individual as a unique combination of many influences Further research is needed particularly on multicultural status however due to the tendency for pertinent studies to favor more inclusive conflict resolution instruments than those utilized for the purposes of this research other means of overall analysis should be considered
