**The Politics of Child Daycare in Britain** Vicky Randall, 2000 Child daycare is a crucial issue for gender equality In Britain its provision and especially publicly provided or subsidised daycare has been meagre in comparison with a range of European States In seeking to explain childcare policy in post war Britain to the present this study focuses primarily on the institutional context It shows how the liberal state tradition limiting intervention in the private family and market spheres has intersected with an issue that impinges on family responsibilities and arguably requires public resources for its effective resolution The book also argues that liberalism in practice an eminently flexible approach cannot on its own explain policy Account must be taken of the gender assumptions of policy makers and their principal advisers including in the past trade unions of the centralization of the British governmental process of the weakness and fragmentation of the childcare lobby including the less than wholehearted involvement of the women s movement and of the sheer contingencies of timing
