Word and Image ,1985    Early Modern Genres of History Emil Nicklas Johnsen,Ina Louise Stovner,2024-05-02 Bringing together an international group of literary scholars intellectual historians and cultural historians this book discusses history in its various forms either as texts or images in the early modern period 1500 1800 Early Modern Genres of History explores different genres and representational modes regarded as history before history became a scientific discipline during the nineteenth century It does not seek to show how the modern discipline of history as an academic study developed but rather to examine the ways in which historical texts and images became part of a wider field of early modern knowledge formations This volume demonstrates how history was connected to the developments in the public sphere how antiquarian historians used genres in their work how history evolved and functioned in the visual field and how historical genres travelled across different contexts Overall Early Modern Genres of History reveals how the diversity of historical representations in the early modern period has contributed to the broader foundations of history as it is understood in the twenty first century This volume is of great use to upper level undergraduates postgraduates and scholars interested in early modern Europe and the history of knowledge across both the history and literature disciplines The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons CC BY 4 0 license    Varieties of Realism

Margaret A. Hagen,1986-05-31 Varieties of Realism argues that it is not possible to represent the layout of objects and surfaces in space outside the dictates of formal visual geometry the geometry of natural perspective The book examines most of the world s coherent representational art styles both in terms of the geometry of their creation and in terms of their perceptual effects on the viewer A lucid exposition of modern geometrical principles and relations accessible to the nonmathematical reader is followed by an analysis of all known styles as variants of natural perspective as true varieties of realism Delineating the physical and mechanical constraints that determine the act of visual representation in painting and drawing the author traces the intimate relations among seemingly distant styles and considers the kind of perceptual information about the world each can carry Margaret Hagen is a perceptual psychologist with an ecological point of view Her rigorous but readable presentation of visual theory and research offers provocative new insights into the connections among vision geometry and art    Imagination and Language Alison Fairlie,1981-07-23 A collection of essays on Constant Baudelaire Nerval and Flaubert by Professor Alison Fairlie    **Sartre: Literature and Theory** Rhiannon Goldthorpe,1984

In this major study Rhiannon Goldthorpe takes up the challenge of Sartre s diversity in an original and provocative way Her detailed and comprehensive exploration of the relationship between the theoretical and literary works pays due attention to their characteristic complexity The discussion of La Naus e Les Mouches Huis clos Les Mains sales and Les S questr s e Altona for example does not present these literary texts as mere illustrations of Sartre s theories of consciousness imagination and emotion but as subtle philosophical and linguistic investigations in their own right In addition by reference

to recently published fragments from Sartre's earlier work Goldthorpe calls into question existing views of Sartre's intellectual development and provides a new history of the crucial Sartrean concept of commitment , **Beyond IQ** Robert J. Library,1985 **SVEC 2006:11** David Adams,2006 La Fontaine's Contes et nouvelles en vers was probably the most famous illustrated book to have appeared in France during the eighteenth century The celebrated 1762 edition published by Louis XV's detested tax gatherers the Compagnie des Fermiers g n raux held among its claims to supremacy its magnificent copperplate illustrations designed by Charles Eisen In this highly illustrated book David Adams first sets out a publishing history of the edition using historical bibliographical and cultural evidence and next provides a detailed study of the plates as a whole In so doing he gives his interpretation of the values and attitudes of the Compagnie the members of which took great care to ensure that the plates reflected their view of contemporary society Finally he gives a synoptic view of the illustrations and situates the work in the wider context of contemporary French illustrated books This pioneering study of the relationship between text and image in eighteenth century France shows that the illustrations the Fermiers g n raux commissioned for this literary classic were intended to promote their own patrician values and to assert their freedom of action turning literature into propaganda with consequences they did not foresee
