

# Words And Buildings A Vocabulary Of Modern Architecture

**Caroline O'Donnell**

## **Words And Buildings A Vocabulary Of Modern Architecture:**

**Words and Buildings** Adrian Forty,2004 Available again a wholly original study of the complex relationship between architecture and language that has changed and enriched the way we think and talk about architecture The words we use when we talk and write about architecture describe more than just bricks and mortar they direct the ways we think of and live with buildings This groundbreaking book is the first thorough examination of the complex relationship between architecture and language as intricate social practices Six rigorously argued chapters investigate the language of modernism language and drawing masculine and feminine architecture language metaphors science in architecture and the social properties of architecture There follows a vocabulary of key words such as Character Form History and Space locating each words modern meaning within an historical and theoretical framework and setting out clearly its development and relevance for architects historians philosophers critics and the users of the buildings themselves Architects should be made to read Words and Buildings Architecture Today Unusually clear and accessible Students of all kinds will love this book The Architectural Review A forceful clear and sophisticated exposition of the role of conceptual thought in architectural discourse The Architects Journal     *Words and Buildings* Adrian Forty,2000     Building Theories Franca Trubiano,2022-11-25

Building Theories speaks to the value of words in architecture It addresses the author's fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de M zi res Boull e Laugier Rondelet Semper Viollet le Duc H bsch B tticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect's composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form     *The Production Sites of Architecture* Sophia Psarra,2019-01-14 The Production Sites of Architecture examines the intimate link between material sites and meaning It

explores questions such as how do spatial configurations produce meaning What are alternative modes of knowledge production How do these change our understanding of architectural knowledge Featuring essays from an international range of scholars the book accepts that everything about the production of architecture has social significance It focuses on two areas firstly relationships of spatial configuration form order and classification secondly the interaction of architecture and these notions with other areas of knowledge such as literature inscriptions interpretations and theories of classification ordering and invention Moving beyond perspectives which divide architecture into either an aesthetic or practical art the authors show how buildings are informed by intersections between site and content space and idea thought and materiality architecture and imagination Presenting illustrated case studies of works by architects and artists including Amale Andraos Dan Wood OMA Koen Deprez and John Soane The Production Sites of Architecture makes a major contribution to our understanding of architectural theory

**Concrete and Culture** Adrian Forty, 2013-02-15 Concrete has been used in arches vaults and domes dating as far back as the Roman Empire Today it is everywhere in our roads bridges sidewalks walls and architecture For each person on the planet nearly three tons of concrete are produced every year Used almost universally in modern construction concrete has become a polarizing material that provokes intense loathing in some and fervent passion in others Focusing on concrete's effects on culture rather than its technical properties Concrete and Culture examines the ways concrete has changed our understanding of nature of time and even of material Adrian Forty concentrates not only on architects responses to concrete but also takes into account the role concrete has played in politics literature cinema labor relations and arguments about sustainability Covering Europe North and South America and the Far East Forty examines the degree that concrete has been responsible for modernist uniformity and the debates engendered by it The first book to reflect on the global consequences of concrete Concrete and Culture offers a new way to look at our environment over the past century

**Niche Tactics** Caroline O'Donnell, 2015-04-10 Niche Tactics aligns architecture's relationship with site with its ecological analogue the relationship between an organism and its environment Bracketed between texts on giraffe morphology ecological perception ugliness and hopeful monsters architectural case studies investigate historical moments when relationships between architecture and site were productively intertwined from the anomalous city designs of Francesco de Marchi in the sixteenth century to Le Corbusier's near eradication of context in his Plan Voisin in the twentieth century to the more recent contextualist movements Extensively illustrated with 140 drawings and photographs Niche Tactics considers how attention to site might create a generative language for architecture today

**Evoking through Design** Matias del Campo, 2017-03-23 Evoking Through Design Contemporary Moods in Architecture is visually stunning featuring built work and speculative projects which highlight how contemporary practices are using devices such as spatial compositing surface articulation and novel manipulations of materials in order to constitute spatial conditions radiating in delicate and sophisticated atmospheres Contributors Benjamin Bratton Jeffrey Kipnis Neil Leach Silvia Levin Frederic

Migayrou Juhani Pallasmaa David Ruy and Mario Carpo Architects Phillip Beesley Marjan Colletti Hernan Diaz Alonso Evan Douglis Michael Hansmayer Steven Holl Ferda Kolatan Sean Lally Greg Lynn and Peter Zumthor *Architecture + Design*,2003 AA Files,2005 **Journal of the Society of Architectural Historians** Society of Architectural Historians,2005 Includes special issues Nederlands kunsthistorisch jaarboek,2001 **Exploring Architecture** Eleanor Gawne,Michael Snodin,2004-11-10 Architecture is an art expressing most clearly the values of its age as in the great cathedrals of the Middle Ages or the corporate headquarters of today Buildings work directly on our emotions filling us with awe or serenity they also help us to organize our crowded lives Ptah,2001 Gap in Translation Gina M. Siciliano,2009 **Flanders Architectural Yearbook 02/03** Paul Van Grembergen,2005-04 An overview of 2002 2003 architecture trends is presented by the Flemish Institute for Architects VAI in this 2004 edition of the Flanders Architectural Yearbook *Art of home in the Netherlands, 1500-1800* Jan de Jong,2001 Opstellen over de inrichting en aankleding van het woonhuis en de weergave daarvan in de beeldende kunst in de periode 1500 1800 Blueprint,2000 The Federal Architect,1930 *RIBA Journal*,2000 The Architect and Building News,1927
