Working In Groups 5th Edition:

An Experiential Approach to Group Work, Second Edition Rich Furman, Kimberly Bender, Diana Rowan, 2014-06 An Experiential Approach to Group Work is not your typical group work text. Using dozens of exercises that build practice tested skills, the authors' approach is in perfect step with CSWE's competence based education requirements. The book is organized into three sections: the first addresses stages of group practice, the second looks at major types of groups, and the final section looks at examples of group work practice with special populations.

Foundations of Social Work Practice in the Field of Aging Roberta Rubin Greene, 2007 The aging of societies is a global phenomenon. In the United States alone, the life expectancy for both men and women will continue to increase over the next few decades, and with that a population explosion of older adults. The dramatic increase in the number and diversity of older adults elevates the visibility of gerontological matters. As a result, social work practice is becoming more multigenerational, thereby demanding social workers regardless of their professional endeavors to be equipped with the most innovative theories and practices to serve older adults and their families. This comprehensive text spans the new knowledge and skills required in direct practice areas group work and macro practice. It also outlines the Geriatric Social Work Competencies as developed by social work educators necessary to serve the older adult population and suggests how these competencies can be integrated into foundation curriculum. Social work educators, students, practitioners, administrators, and policymakers will find updated useful information in this text regarding assessment tools, cultural influences, evidence based practices, intervention techniques, theoretical examples. Individuals are living longer and healthier lives in part because of the extraordinary growth of biomedical knowledge and public health initiatives. The confluence of the rapid and large increase of the older population and the exponential increase in the dissemination of knowledge create an imperative for social workers to employ the most recent knowledge in their practice with people living increasingly long lives.

High-Performing Self-Managed Work Teams Dale E. Yeatts, Cloyd Hyten, 1998 Since the mid 1970s, pressure from international competition has forced business in the United States to look for better ways to achieve and maintain a competitive position. One popular tool is the self managed work team (SMWT). This book provides a thorough examination of SMWT both at the level of theory and at the practical level of when to use work teams to find solutions and how to develop successful teams. By examining the most widely accepted theories of work team performance, illustrated by 10 case studies from the areas of manufacturing, public service, and health care, the authors define how high performing self managed work teams differ from work groups and short term teams, the problems which compel an organization to use them, and the
