Co-Creativity and Engaged Scholarship Alex Franklin, 2022-01-02 This open access book explores creative and collaborative forms of research praxis within the social sustainability sciences The term co creativity is used in reference to both individual methods and overarching research approaches Supported by a series of in depth examples the edited collection critically reviews the potential of co creative research praxis to nurture just and transformative processes of change Included amongst the individual chapters are first hand accounts of such as militant research strategies and guerrilla narrative decolonial participative approaches appreciative inquiry and care ethics deep mapping photo voice community arts digital participatory mapping creative workshops and living labs The collection considers how through socially inclusive forms of action and reflection such co creative methods can be used to stimulate alternative understandings of why and how things are and how they could be It provides illustrations of and problematizes the use of co creative methods as overtly disruptive interventions in their own right and as a means of enriching the transformative potential of transdisciplinary and more traditional forms of social science research inquiry The positionality of the researcher together with the emotional and embodied dimensions of engaged scholarship are threads which run throughout the book So too does the question of how to communicate sustainability science research in a meaningful way Engaged Scholarship Lynette Shultz, Tania

Kajner, 2013-09-03 This volume brings together diverse theoretical reflections and practices of community engaged scholarship in order to stimulate critical discussion deepen theory and invite critical practice It is an international trend that higher education institutions and agencies are encouraging and promoting community engagement At the same time there is recognition of a lack of consistent definitions and understandings of what it is they are promoting As a counterweight to the dominance of pragmatic and technical discussions in the literature on engaged scholarship the chapters in this book shift the discourse to ask foundational questions that emphasize the political nature of engagement Recognizing that acts of engagement are never neutral the authors in this book explore how engaged scholarship requires decision making that is inherently grounded in values beliefs and interpretations of what is and what ought to be Alongside complex global and local social movements rising to address issues for example climate change or the global financial collapse and the uneven consequences of these globalized problems we see corresponding concerns expressed about the limited participation by excluded silenced and invisibilized people throughout the world How can engaged scholarship be mobilized and who will it serve within such contexts With contributions covering such diverse topics as a non binary approach to engagement citizenship of knowledge university contexts and corporatization stranger pedagogies and anti foundational approaches to service learning contemporary revolutionary movements in the Arab world and transforming higher education through Africanist onto epistemologies this volume is poised to open the door to a deeper understanding of engaged scholarship
