National Football League Record & Fact Book* National Football League, 1984 **Prediction, Projection and Forecasting** Thomas L. Saaty, Luis G. Vargas, 1991 We predict when we say in advance foretell or prophesy what is likely to happen in the future We project when we calculate the numerical value associated with a future event We forecast a special kind of prediction on data of past happenings to generate or cast data for future by relying on happenings Generally one predicts yes no a war an earthquake or the outcome of a chess match projects the value of the GNP or of unemployment and forecasts the weather and more scientifically the economic trends Prediction projection and forecasting must be constrained in time and space when and where Often the accuracy of a forecast is of interest along with how sensitive the outcome is to changes in the factors involved Is there a basis for improving the wisdom we need to make correct and useful predictions We believe there is and that it can be cultivated by studying the approach given here along with the various examples To the best of our knowledge no other work has approached prediction in the scientific framework of hierarchies Prediction is the synthesis of past and present in an attempt to foretell the future In our view creation is not the ultimate phenomenon of the world Nature creates forms and so do we The problem is to surmise the eventual purpose impact and use of creation It is the synthesis or outcome of bringing together the results of creation that we need to predict **International Sports Economics Comparisons** Rodney D.
