Deep Learning with TensorFlow and Keras Amita Kapoor, Antonio Gulli, Sujit Pal, Francois Chollet, 2022-10-06 Build cutting edge machine and deep learning systems for the lab production and mobile devices Key Features Understand the fundamentals of deep learning and machine learning through clear explanations and extensive code samples Implement graph neural networks transformers using Hugging Face and TensorFlow Hub and joint and contrastive learning Learn cutting edge machine and deep learning techniques Book Description Deep Learning with TensorFlow and Keras teaches you neural networks and deep learning techniques using TensorFlow TF and Keras You ll learn how to write deep learning applications in the most powerful popular and scalable machine learning stack available TensorFlow 2 x focuses on simplicity and ease of use with updates like eager execution intuitive higher level APIs based on Keras and flexible model building on any platform This book uses the latest TF 2 0 features and libraries to present an overview of supervised and unsupervised machine learning models and provides a comprehensive analysis of deep learning and reinforcement learning models using practical examples for the cloud mobile and large production environments This book also shows you how to create neural networks with TensorFlow runs through popular algorithms regression convolutional neural networks CNNs transformers generative adversarial networks GANs recurrent neural networks RNNs natural language processing NLP and graph neural networks GNNs covers working example apps and then dives into TF in production TF mobile and TensorFlow with AutoML What you will learn Learn how to use the popular GNNs with TensorFlow to carry out graph mining tasks Discover the world of transformers from pretraining to fine tuning to evaluating them Apply self supervised learning to natural language processing computer vision and audio signal processing Combine probabilistic and deep learning models using TensorFlow Probability Train your models on the cloud and put TF to work in real environments Build machine learning and deep learning systems with TensorFlow 2 x and the Keras API Who this book is for This hands on machine learning book is for Python developers and data scientists who want to build machine learning and deep learning systems with TensorFlow This book gives you the theory and practice required to use Keras TensorFlow and AutoML to build machine learning systems Some machine learning knowledge would be useful We don t assume TF knowledge *TensorFlow 1.x Deep Learning Cookbook* Antonio Gulli, Amita Kapoor, 2017-12-12 Take the next step in implementing various common and not so common neural networks with Tensorflow 1 x About This Book Skill up and implement tricky neural networks using Google s TensorFlow 1 x An easy to follow guide that lets you explore reinforcement learning GANs autoencoders multilayer perceptrons and more Hands on recipes to work with Tensorflow on desktop mobile and cloud environment Who This Book Is For This book is intended for data analysts data scientists machine learning practitioners and deep learning enthusiasts who want to perform deep learning tasks on a regular basis and are looking for a handy guide they can refer to People who are slightly familiar with neural networks and now want to gain expertise in working with different types of neural networks and datasets will

find this book quite useful What You Will Learn Install TensorFlow and use it for CPU and GPU operations Implement DNNs and apply them to solve different AI driven problems Leverage different data sets such as MNIST CIFAR 10 and Youtube8m with TensorFlow and learn how to access and use them in your code Use TensorBoard to understand neural network architectures optimize the learning process and peek inside the neural network black box Use different regression techniques for prediction and classification problems Build single and multilayer perceptrons in TensorFlow Implement CNN and RNN in TensorFlow and use it to solve real world use cases Learn how restricted Boltzmann Machines can be used to recommend movies Understand the implementation of Autoencoders and deep belief networks and use them for emotion detection Master the different reinforcement learning methods to implement game playing agents GANs and their implementation using TensorFlow In Detail Deep neural networks DNNs have achieved a lot of success in the field of computer vision speech recognition and natural language processing The entire world is filled with excitement about how deep networks are revolutionizing artificial intelligence This exciting recipe based guide will take you from the realm of DNN theory to implementing them practically to solve the real life problems in artificial intelligence domain In this book you will learn how to efficiently use TensorFlow Google s open source framework for deep learning You will implement different deep learning networks such as Convolutional Neural Networks CNNs Recurrent Neural Networks RNNs Deep Q learning Networks DQNs and Generative Adversarial Networks GANs with easy to follow independent recipes You will learn how to make Keras as backend with TensorFlow With a problem solution approach you will understand how to implement different deep neural architectures to carry out complex tasks at work You will learn the performance of different DNNs on some popularly used data sets such as MNIST CIFAR 10 Youtube8m and more You will not only learn about the different mobile and embedded platforms supported by TensorFlow but also how to set up cloud platforms for deep learning applications Get a sneak peek of TPU architecture and how they will affect DNN future By using crisp no nonsense recipes you will become an expert in implementing deep learning techniques in growing real world applications and research areas such as reinforcement learning GANs autoencoders and more Style and approach This book consists of hands on recipes where you ll deal with real world problems You ll execute a series of tasks as you walk through data mining challenges using TensorFlow 1 x Your one stop solution for common and not so common pain points this is a book that you must have on the shelf

Programming Large Language Models with Azure Open AI Francesco Esposito, 2024-04-03 Use LLMs to build better business software applications Autonomously communicate with users and optimize business tasks with applications built to make the interaction between humans and computers smooth and natural Artificial Intelligence expert Francesco Esposito illustrates several scenarios for which a LLM is effective crafting sophisticated business solutions shortening the gap between humans and software equipped machines and building powerful reasoning engines Insight into prompting and conversational programming with specific techniques for patterns and frameworks unlock how natural language can also

lead to a new advanced approach to coding Concrete end to end demonstrations featuring Python and ASP NET Core showcase versatile patterns of interaction between existing processes APIs data and human input Artificial Intelligence expert Francesco Esposito helps you Understand the history of large language models and conversational programming Apply prompting as a new way of coding Learn core prompting techniques and fundamental use cases Engineer advanced prompts including connecting LLMs to data and function calling to build reasoning engines Use natural language in code to define workflows and orchestrate existing APIs Master external LLM frameworks Evaluate responsible AI security privacy and accuracy concerns Explore the AI regulatory landscape Build and implement a personal assistant Apply a retrieval augmented generation RAG pattern to formulate responses based on a knowledge base Construct a conversational user interface For IT Professionals and Consultants For software professionals architects lead developers programmers and Machine Learning enthusiasts For anyone else interested in natural language processing or real world applications of human like language in software

Python Machine Learning By Example Yuxi (Hayden) Liu, 2024-07-31 Author Yuxi Hayden Liu teaches machine learning from the fundamentals to building NLP transformers and multimodal models with best practice tips and real world examples using PyTorch TensorFlow scikit learn and pandas Free with your book DRM free PDF version access to Packt's next gen Reader Key Features Discover new and updated content on NLP transformers PyTorch and computer vision modeling Includes a dedicated chapter on best practices and additional best practice tips throughout the book to improve your ML solutions Implement ML models such as neural networks and linear and logistic regression from scratch

Book DescriptionThe fourth edition of *Python Machine Learning By Example* is a comprehensive guide for beginners and experienced machine learning practitioners who want to learn more advanced techniques such as multimodal modeling Written by experienced machine learning author and ex Google machine learning engineer Yuxi Hayden Liu this edition emphasizes best practices providing invaluable insights for machine learning engineers data scientists and analysts Explore advanced techniques including two new chapters on natural language processing transformers with BERT and GPT and multimodal computer vision models with PyTorch and Hugging Face You'll learn key modeling techniques using practical examples such as predicting stock prices and creating an image search engine This hands on machine learning book navigates through complex challenges bridging the gap between theoretical understanding and practical application Elevate your machine learning and deep learning expertise tackle intricate problems and unlock the potential of advanced techniques in machine learning with this authoritative guide Email sign up and proof of purchase required

What you will learn Follow machine learning best practices throughout data preparation and model development Build and improve image classifiers using convolutional neural networks CNNs and transfer learning Develop and fine tune neural networks using TensorFlow and PyTorch Analyze sequence data and make predictions using recurrent neural networks RNNs transformers and CLIP Build classifiers using support vector machines SVMs and boost performance with PCA Avoid overfitting using regularization

feature selection and more Who this book is for This expanded fourth edition is ideal for data scientists ML engineers analysts and students with Python programming knowledge The real world examples best practices and code prepare anyone undertaking their first serious ML project [Hands-On Machine Learning on Google Cloud Platform](#) Giuseppe Ciaburro,V Kishore Ayyadevara,Alexis Perrier,2018-04-30 Unleash Google s Cloud Platform to build train and optimize machine learning models Key Features Get well versed in GCP pre existing services to build your own smart models A comprehensive guide covering aspects from data processing analyzing to building and training ML models A practical approach to produce your trained ML models and port them to your mobile for easy access Book Description Google Cloud Machine Learning Engine combines the services of Google Cloud Platform with the power and flexibility of TensorFlow With this book you will not only learn to build and train different complexities of machine learning models at scale but also host them in the cloud to make predictions This book is focused on making the most of the Google Machine Learning Platform for large datasets and complex problems You will learn from scratch how to create powerful machine learning based applications for a wide variety of problems by leveraging different data services from the Google Cloud Platform Applications include NLP Speech to text Reinforcement learning Time series recommender systems image classification video content inference and many other We will implement a wide variety of deep learning use cases and also make extensive use of data related services comprising the Google Cloud Platform ecosystem such as Firebase Storage APIs Datalab and so forth This will enable you to integrate Machine Learning and data processing features into your web and mobile applications By the end of this book you will know the main difficulties that you may encounter and get appropriate strategies to overcome these difficulties and build efficient systems What you will learn Use Google Cloud Platform to build data based applications for dashboards web and mobile Create train and optimize deep learning models for various data science problems on big data Learn how to leverage BigQuery to explore big datasets Use Google s pre trained TensorFlow models for NLP image video and much more Create models and architectures for Time series Reinforcement Learning and generative models Create evaluate and optimize TensorFlow and Keras models for a wide range of applications Who this book is for This book is for data scientists machine learning developers and AI developers who want to learn Google Cloud Platform services to build machine learning applications Since the interaction with the Google ML platform is mostly done via the command line the reader is supposed to have some familiarity with the bash shell and Python scripting Some understanding of machine learning and data science concepts will be handy *Introduction to Intelligent Systems, Control, and Machine Learning using MATLAB* Marco P. Schoen,2023-11-16 Dive into intelligent systems machine learning and control with this hands on project based textbook including over 20 hands on Arduino Matlab and Simulink assignments With over 120 end of chapter problems and solutions for instructors this is the ideal practical introduction for senior and graduate engineering students **Building Data-Driven Applications with LlamaIndex** Andrei Gheorghiu,2024-05-10 Solve real world problems easily with artificial

intelligence AI using the LlamaIndex data framework to enhance your LLM based Python applications

Key Features

- Examine text chunking effects on RAG workflows and understand security in RAG app development
- Discover chatbots and agents and learn how to build complex conversation engines
- Build as you learn by applying the knowledge you gain to a hands on project

Book Description

Discover the immense potential of Generative AI and Large Language Models LLMs with this comprehensive guide

- Learn to overcome LLM limitations such as contextual memory constraints prompt size issues real time data gaps and occasional hallucinations
- Follow practical examples to personalize and launch your LlamaIndex projects
- mastering skills in ingesting indexing querying and connecting dynamic knowledge bases

From fundamental LLM concepts to LlamaIndex deployment and customization this book provides a holistic grasp of LlamaIndex s capabilities and applications

By the end you ll be able to resolve LLM challenges and build interactive AI driven applications using best practices in prompt engineering and troubleshooting Generative AI projects

What you will learn

- Understand the LlamaIndex ecosystem and common use cases
- Master techniques to ingest and parse data from various sources into LlamaIndex
- Discover how to create optimized indexes tailored to your use cases
- Understand how to query LlamaIndex effectively and interpret responses
- Build an end to end interactive web application with LlamaIndex Python and Streamlit
- Customize a LlamaIndex configuration based on your project needs
- Predict costs and deal with potential privacy issues
- Deploy LlamaIndex applications that others can use

Who this book is for

This book is for Python developers with basic knowledge of natural language processing NLP and LLMs looking to build interactive LLM applications

Experienced developers and conversational AI developers will also benefit from the advanced techniques covered in the book to fully unleash the capabilities of the framework

Data Analytics

Anthony S. Williams, *Data Analytics 7 BOOK BUNDLE*

Book 1 Data Analytics For Beginners

In this book you will learn

- What is Data Analytics
- Types of Data Analytics
- Evolution of Data Analytics
- Big Data Defined
- Data Mining
- Data Visualization
- Cluster Analysis

And of course much more

Book 2 Deep Learning With Keras

In this book you will learn

- Deep Neural Network
- Neural Network Elements
- Keras Models
- Sequential Model
- Functional API Model
- Keras Layers
- Core Keras Layers
- Convolutional Keras Layers
- Recurrent Keras Layers
- Deep Learning Algorithms
- Supervised Learning Algorithms
- Applications of Deep Learning Models
- Automatic Speech and Image Recognition
- Natural Language Processing

And of course much more

Book 3 Analyzing Data With Power BI

In this book you will learn

- Basics of data analysis processes
- Fundamental data analysis algorithms
- Basic of data and text mining data visualization and business intelligence
- Techniques used for analysing quantitative data
- Basic data analysis tasks
- Conceptual logical and physical data models
- Power BI service and data modelling
- Creating reports and visualizations in Power BI

And of course much more

Book 4 Reinforcement Learning With Python

In this book you will learn

- Types of fundamental machine learning algorithms in comparison to reinforcement learning
- Essentials of reinforcement learning process
- Markov decision processes and basic parameters
- How to integrate reinforcement learning algorithm using OpenAI Gym
- How to integrate Monte Carlo methods for prediction
- Monte Carlo tree

search And much much more Book 5 Artificial Intelligence Python In this book you will learn Different artificial intelligence approaches and goals How to define AI system Basic AI techniques Reinforcement learning And much much more Book 6 Text Analytics With Python In this book you will learn Text analytics process How to build a corpus and analyze sentiment Named entity extraction with Groningen meaning bank corpus How to train your system Getting started with NLTK How to search syntax and tokenize sentences Automatic text summarization Stemming word and topic modeling with NLTK And much much more Book 7 Convolutional Neural Networks In Python In this book you will learn Architecture of convolutional neural networks Solving computer vision tasks using convolutional neural networks Python and computer vision Automatic image and speech recognition Theano and TenroFlow image recognition And of course much more Download this book bundle NOW and SAVE money

Openai Compare Install Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices.
