IBM System Blue Gene Solution Blue Gene/Q Application Development Megan Gilge, IBM Redbooks, 2014-02-13 This IBM Redbooks publication is one in a series of IBM books written specifically for the IBM System Blue Gene supercomputer Blue Gene Q which is the third generation of massively parallel supercomputers from IBM in the Blue Gene series. This document provides an overview of the application development environment for the Blue Gene Q system. It describes the requirements to develop applications on this high performance supercomputer. This book explains the unique Blue Gene Q programming environment. This book does not provide detailed descriptions of the technologies that are commonly used in the supercomputing industry such as Message Passing Interface MPI and Open Multi Processing OpenMP. References to more detailed information about programming and technology are provided. This document assumes that readers have a strong background in high performance computing HPC programming. The high level programming languages that are used throughout this book are C, C, and Fortran95. For more information about the Blue Gene Q system see IBM Redbooks on page 159.
