

## **Study: Colder Weather Causes Fewer Votes and Healthier Eating**

According to psychologists, there's nothing quite like the cold, dark days of winter to make us grumpy, less healthy, and less inclined to exercise. Now, new research suggests that the cold weather may also affect our political behavior, making us less likely to turn out to the polls and more inclined to support candidates who emphasize family values and conservatism.

### **Conservative Positions**

Electoral and policy studies have long suggested that conservative voters tend to be more conservative than liberal voters. While this is true in most cases, new research from the University of British Columbia suggests that the political leanings of voters are more strongly influenced by the weather than previously thought.

Political scientists have traditionally assumed that voters' political leanings are determined by their social and economic circumstances. In this new research, however, researchers found that the weather had a significant influence on voters' political leanings as well.

### **More Conservatism with Cold Weather**

#### **Political Themes**

Conservative voters tend to emphasize:

• **Traditional family values**

• **Conservative economic policies** such as cutting taxes and reducing

government intervention in the marketplace and maintaining

private ownership of business

• **Conservative social issues** such as traditional family values, more

conservatism, and less government regulation of society

• **Conservative foreign policy**

• **Conservative political philosophy**

Conservative voters are more likely to support family-oriented

candidates for elected office

• **Conservative social issues**

• **Conservative economic policies**

• **Conservative foreign policy**
