

31 This is a letter of complaint. The tone will be mild.

**(Suggested Answer Key)**

- complain/disappointing service/received from catering company
- guests kept waiting/food failed to arrive on time/many dishes/ cold
- advertisement stated/huge variety of traditional and continental dishes/unfortunately untrue/only three available
- guests complained/waiters/unhelpful/ rude
- prices/not reasonable/dishes/more expensive than advertised / overcharged/final bill
- upset/expect/compensation for/inconvenience/otherwise/take further action

### Unit 3 – Making a Living

- 1 a) A. cleaner E teacher  
B. florist F barber  
C. cameraman G vet  
D. decorator

**b) (Suggested Answer Key)**

- The cameraman would probably be paid well if the film he was working on was predicted to be a box office success.
- I would find the teacher's job more challenging than the others because you need a lot of patience to teach. I can also imagine the satisfaction you might get when you realise that your pupils finally understand the difficult aspects of the lesson.
- The vet's job would be extremely interesting for me as I've always loved animals and am especially interested in all aspects of wildlife.
- The decorator's job would be too repetitive for me. Imagine doing the same thing day in, day out! It must be very tiring too, looking up and down at ceilings and walls for hours on end!
- The most boring job would probably be the barber's job. The only thing that might reduce the boredom would be chatting with customers.

- c) A: I would certainly consider being a florist, as I love the idea of working with beautiful colours and shapes to create unusual designs.  
B: I'm not so sure. I'm not really an arty sort of person, you see.

A: I would certainly not consider being a cleaner, simply because I have enough to do cleaning my own house never mind cleaning other houses!

B: I agree. It's very hard work.

- 2
- follow your dreams
  - change your plans
  - step into sb's shoes

**(Suggested Answer Key)**

- I've always believed that it is important to follow your dreams and not be influenced by others who might want to lead you along a different path.
- At first I wanted to become a journalist, but then I changed my plans and finally became an English teacher.
- When my mother retired, I stepped into her shoes and took over the business.

**3 (Suggested Answer Key)**

- |                |              |
|----------------|--------------|
| • 1 salary     | 3 cash       |
| • 2 wages      | 4 pay        |
| • 5 trade      | 7 work       |
| • 6 occupation | 8 profession |
| • 9 team       | 11 staff     |
| • 10 crew      | 12 personnel |
| • 13 employer  | 15 employee  |
| • 14 worker    | 16 trainee   |

**4 (Suggested Answer Key)**

- 1 ... gave up her career to be with her children.
- 2 She volunteers every weekend to help the homeless people of the area ...
- 3 ... never seems to lose his temper.
- 4 ... was finally fired.
- 5 ... person who eventually set up his own business.
- 6 ... kept us all going through that difficult time.
- 7 He became successful simply ...
- 8 ... be a lifeguard

**5 a) (Suggested Answer Key)**

A: Well, personally, I think that Claire Martin would be most suitable for the post advertised, wouldn't you agree?

B: Mmmm, yes. I mean the job certainly needs someone who will be patient with more demanding residents and who can also manage the numerous enquiries that people will have. What do you think about the other applicant?

## Upstream B2 Final Test Answer Key:

A Theory of Supply Chains Carlos F. Daganzo, 2012-12-06 This work was stimulated by a comment made by a former student Prof Alan Erera of Georgia Tech in connection with an inventory stability game he was going to play in one of his logistics classes This was the well known beer game that is often played in business schools to illustrate the bullwhip effect in supply chains Al had said to me that he did not have to tell his students how to reorder replacement parts from the other members of the supply chain because he knew from experience that the order sizes the players would generate as the game progressed would become chaotic anyhow Since I had not played the beer game his assertion was intriguing to me Why would such an unstructured game always lead to the same undesirable effect Did it have something to do with psychology What is it that players did to generate instabilities I posed these to other people but could not get completely satisfactory answers Thus the bullwhip mystery remained at least in my mind Since inventory chains are conservative systems analogous to a traffic stream and since traffic flow models exhibit similar effects the instability of automobile platoons and of certain numerical methods being two notable examples I suspected that traffic flow theory might shed some light on the puzzle 1994 *IEEE GLOBECOM*, 1994 *Conference Record*, 1994 *Journal of the American Helicopter Society* American Helicopter Society, 1991 *Vortex Ventilation* Arslan Malikovich Ziganshin, Konstantin Ivanovich Logachev, 2025-08-04 Vortex Ventilation Shaped Units of Energy Saving Ventilation Systems presents innovative methods for optimizing ventilation systems through vortex zone and computational fluid dynamics analysis The research explores separated flows in ventilation elements offering insights for students and professionals The work introduces computational fluid dynamics methods to map vortex zones in duct fittings enabling energy efficient designs Strategic shaping along these zones reduces aerodynamic resistance decreasing energy consumption and operating costs This approach allows for smaller fan sizes and reduced capital costs across entire systems Key features include Numerical and experimental research algorithms Discrete vortex method applications Geometric similarities in vortex zone patterns Universal shapes for specific duct fittings Future development opportunities encompass enhanced fitting elements expanded system components and investigation of secondary vortex zones and contamination effects This book significantly advances technical science by addressing energy consumption reduction providing practical methodologies for designers to create more efficient and cost effective ventilation systems *Paper*, 1993 *Management Science*, 1995 Issues for Feb 1965 Aug 1967 include *Bulletin of the Institute of Management Sciences* **AIAA Journal** American Institute of Aeronautics and Astronautics, 2005 *Annual IEEE Semiconductor Thermal Measurement and Management Symposium*, 2001 **Cancer Research**, 1997-11 **Teaching Secondary School Mathematics** Alfred S. Posamentier, Jay Stepelman, 1995 91-0368 - 91-0399, 1991 Berichte Über Di Tagung International Association for Hydraulic Research, 1979 *Compressor Surge and Stall* R. C. Pampreen, 1993 High efficiency axial and centrifugal compressors are important in fields as diverse as aircraft engines

superchargers and turbochargers process and refrigeration compressors Compressors must achieve high efficiency in blade rows in diffusing flow fields Of equal and sometimes greater importance is the range of stable operation of the compressor Blade row stall characteristics determine the limits of stable operation Blading can stall uniformly with symmetric flow breakdown or asymmetrically in rotating stall which propagates around the periphery of the blade row Depending on aerodynamic conditions surge may occur instead of in concert with or subsequent to blade row stall The transient breakdown and recovery of aerodynamic loading not only limits compressor performance but also leads to mechanical failures caused by the vibrational loads imposed on the blades There is no need to know what initiates these performance limits so that surge and stall margins can be optimized and control strategies can be planned the first step toward understanding is to be knowledgeable about the physical processes occurring during surge and stall This will permit the designer to anticipate variable geometry needs such as variable inlet guide vanes variable stators and bleed port strategies Theoretical treatment is far from being well established however there are many approaches discussed in the literature This book is a unique reference to the subject matter Physical descriptions of the phenomena are given test results are presented and analytical studies are discussed There has been much written about the experimental investigations and theoretical treatments related to surge and stall To assist those who would pursue advancements in furthering our knowledge of surge and stall it seemed appropriate to have a resource that contains a compendium of information on this subject That is the purpose of this book
