Claim:

There are different aquatic systems with diverse organisms.

| Evidence | Reasoning/Justification |
|---|---|
| Aquatic ecosystems have abiotic - temp, light, salinity, depth | Different organisms can tolerate different factors |
| Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both | Bull sharks and manatees are very different, but tolerate same conditions |
| Depth reduces light and increases pressure. Organisms deal with this differently. | Many types of adaptations exist to survive in these conditions |
| The geography of an aquatic environment can determine the life forms present. | Continental shelf gets lots of light, so there's many living things. Not so in the abyss. |
| Photosynthesis takes place in the neritic zone. | It is the most productive area of the ocean. Plankton are base of food chain. |
| Metabolism is affected by temp. Many species are cold-blooded. | Organisms can migrate or must have adaptations to survive. |

Flip Your Classroom Jonathan Bergmann, Aaron Sams, 2023 This revised edition of the groundbreaking book shares innovators Jonathan Bergmann and Aaron Sams' insights on how to successfully flip a classroom and covers new advances in the field. It started with a simple observation: Students need their teachers present to answer questions or to provide help if they get stuck on an assignment. They don't need their teachers present to listen to a lecture or review content. From there, Jon Bergmann and Aaron Sams began the flipped classroom. Students watched recorded lectures for homework and completed their assignments, labs, and tests in class with their teacher available. What they found was that their students demonstrated a deeper understanding of the material than ever before. This is the authors' story updated and expanded to ensure it's as relevant to your classroom as ever. The revised edition includes New case studies illustrating flipped learning applied by an individual teacher and across a school district. A new appendix focused on best practices for creating videos for your classes. Educator examples that demonstrate the ISTE Standards in action. Updates to tools, terms, and resources to reflect the current learning landscape. In the revised edition of this landmark text, you'll discover the flipped mastery model that allows students to learn at their own pace, furthering opportunities for personalized education. This simple concept is easily replicable in any classroom; it doesn't cost much to implement and helps foster self-directed learning. Audience: Elementary and secondary classroom teachers.
