

A stack of approximately 15-20 books is displayed on a dark wooden shelf. The books are bound in various colors, including shades of red, orange, yellow, and brown, with some showing signs of wear and discoloration. The spines of the books are visible, and the overall arrangement is somewhat haphazard, with books of different sizes and thicknesses stacked together.

Stuff Compulsive Hoarding And The Meaning Of Things:

Stuff Randy O. Frost, Gail Steketee, 2010-04-20 The New York Times bestseller *Gripping By* turns fascinating and heartbreaking. **Stuff** invites readers to reevaluate their desire for things. Boston Globe Amazing utterly engrossing. Read it. The Washington Post Book World What possesses someone to save every scrap of paper that's ever come into his home? What compulsions drive a person to sacrifice her marriage or career for an accumulation of seemingly useless things? Randy Frost and Gail Steketee were the first to study hoarding when they began their work a decade ago. They didn't expect that they would end up treating hundreds of patients and fielding thousands of calls from the families of hoarders. Their vivid case studies reminiscent of Oliver Sacks in *Stuff* show how you can identify a hoarder: piles on sofas and beds that make the furniture useless; houses that can be navigated only by following small paths called goat trails; vast piles of paper that the hoarders churn but never discard; even collections of animals and garbage and illuminate the pull that possessions exert over all of us. Whether we're savers, collectors, or compulsive cleaners, very few of us are in fact free of the impulses that drive hoarders to extremes. Authoritative, haunting, and mysterious. It is also intensely not to say compulsively readable. Tracy Kidder Pulitzer Prize winning author. Fascinating: a good mix of cultural and psychological theories on hoarding. Newsweek Pioneering researchers offer a superb overview of a complex disorder that interferes with the lives of more than six million Americans. An absorbing, gripping, important report. Kirkus Reviews starred review.

Stuff Randy O. Frost, Gail Steketee, 2010 Two psychologists analyze the sources of compulsive hoarding behaviors, presenting case studies of sufferers who have rendered their homes virtually unlivable and outlines typical ineffective treatments and the impact of the disorder on families.

Hoarding Memory Amy L. Hubbell, 2020-12 *Hoarding Memory* looks at the ways the stories of the Algerian War (1954-62) have proliferated among the former French citizens of Algeria. By engaging hoarding as a model, Amy L. Hubbell demonstrates the simultaneously productive and destructive nature of clinging to memory. These memories present massive amounts of material akin to the stored objects in a hoarder's house. Through analysis of fiction, autobiography, art, and history that extensively use collecting, layering, and repetition to address painful war memories, Hubbell shows that trauma can be hidden within its own representation. *Hoarding Memory* dedicates chapters to specific authors and artists who use this hoarding technique: Marie Cardinal Le la Sebbar and Benjamin Stora in writing, and Nicole Guiraud and Patrick Altes in art. All were born in Algeria during colonial French rule but in vastly different contexts; each suffered personal or inherited trauma from racism, physical or psychological abuse, terrorism, or other violent acts of war and exile in France. Zineb Sedira's artwork is also included as an example of traumatic memory inherited from her parents. Ultimately, this book shows how traumatic experience can be conveyed in a seemingly open account that is compounded and compacted by the volume of words, images, and other memorial debris that testify to the pain.

Things Worth Keeping Christine Harold, 2020-06-09 A timely examination of the attachments we form to objects and how they might be used to reduce waste. Rampant consumerism has

inundated our planet with pollution and waste Yet attempts to create environmentally friendly forms of consumption are often co opted by corporations looking to sell us more stuff In Things Worth Keeping Christine Harold investigates the attachments we form to the objects we buy keep and discard and explores how these attachments might be marshaled to create less wasteful practices and balance our consumerist and ecological impulses Although all economies produce waste no system generates as much or has become so adept at hiding its excesses as today s mode of global capitalism This book suggests that managing the material excesses of our lives as consumers requires us to build on rather than reject our desire for and attraction to objects Increasing environmental awareness on its own will be ineffective at reversing ecological devastation Harold argues unless it is coupled with a more thorough understanding of how and why we love the things that imbue our lives with pleasure meaning and utility From Marie Kondo s method for decluttering that asks whether the things in our lives spark joy to the advent of emotionally durable design which seeks to reduce consumption and waste by increasing the meaningfulness of the relationship between user and product Harold explores how consumer psychology and empathetic design can transform our perception of consumer products from disposable to interconnected An urgent call for rethinking consumerism Things Worth Keeping shows that by recognizing our responsibility for the things we produce we can become better stewards of the planet
