*Drug and Substance Abuse Among Older Adults* Louis A. Pagliaro, Ann Marie Pagliaro, 2022-03-07 Drug and Substance Abuse Among Older Adults provides a timely comprehensive overview and analysis of the silent epidemic of drug and substance abuse involving elderly Americans. Combining the authors' individual 50 plus years of formal academic and clinical experience, the book presents a critical reflective analysis and synthesis of the published research associated with older adult psychotropic drug use and abuse in the United States. Chapters delineate related causes and consequences and provide the reader with guidance on how to minimize and effectively deal with this significant and growing problem. Related professional reminders throughout each chapter emphasize and remind readers of important basic content and principles while common misbeliefs regarding specific abusable psychotropics and their use by older adults are debunked and corrected. Also included are carefully developed figures and tables to supplement chapter content along with explicit guides and tools to facilitate the assessment and diagnosis of abusable psychotropic dependence or use disorder. Health and social care professionals in the U.S. will learn to assess and diagnose abusable psychotropic dependence or use disorders among older adults and to provide clients quickly and accurately with appropriate efficacious and empirically validated treatment.

**Alcohol and Aging** Alexis Kuerbis, Alison A. Moore, Paul Sacco, Faika Zanjani, 2017-01-24 This book provides a current perspective on alcohol and aging to better understand the trends, costs, benefits, and clinical and community evidenced-based strategies. This book embraces not only the physical, cognitive, psychological, and social health benefits of moderate drinking in the elderly; it also delves into the risks of excessive drinking, including physical and psychiatric morbidity, neurodegeneration, medication complications, and accidents and injuries and loss of independence. Written by experts in the field, this book is the only current text that includes the most current scientific research, empirical and practice information, alongside a comprehensive review of the status of the field that will help guide alcohol use management and stimulate future research. Alcohol and Aging is the ultimate resource for all researchers, educators, clinicians, and professionals working with older adults who drink.

Collecting for the Curriculum Amy J. Catalano, 2015-09-28 If you're a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards, then this book is the only one that offers explicit advice on collection development in curriculum collections. It is for you. While there are many publications on the Common Core for school librarians and K-12 educators, no such literature exists for curriculum librarians at the postsecondary level. This book fills that gap, standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research-based practices in curriculum

development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials

*Preventing Youth Substance Abuse* Patrick H. Tolan, José Szapocznik, Soledad Sambrano, 2007 Adolescent substance use can interfere with cognitive emotional and social development and may even affect later functioning in adult domains such as parenting and employment The Center for Substance Abuse Prevention CSAP recognized that this problem does not arise anew in adolescence but in fact has roots in childhood CSAP identified four critical predictors from childhood for substance use that could be valuable targets for prevention of adolescent substance use parental management of and involvement with the child and the child s social competence self regulation and school achievement In this book the editors bring together a body of intervention research into a practical guide that shows how seven selected prevention programs address these risk factors After introducing the developmental and setting factors that affect risk for substance use a general framework for translating this research into practice is provided Chapters describing each intervention contain user friendly explanations of the theoretical basis intended population methods and procedures and critical implementation characteristics of each program and summarize how it was tested and shown to reduce risk for substance abuse Illustrative case examples are woven throughout the text showing the benefits gained from the approach The book is organized to describe interventions that apply to participants at differing developmental periods Chapters include programs for universal or general population and for high risk youth and families The included chapters cover programs developed and tested for a variety of ethnic and cultural groups across varying locations
