Taxation with Representation: A New Evil James C. Lewis, 2022-04-19 As politicians from both sides of the political spectrum constantly deluge the citizenry with class warfare idioms and clichés aided by the media regarding tax policies, we the people continually are told the rich need to pay their fair share. Or your favorite politician will tell you they are working for the common man or the working class family, working poor or the middle class while simultaneously creating tax policies that fail to uphold their stated objectives at best and at worst outright lie to the public. The politicians' desire to be reelected outweighs their desire to be honest, and despite their own personal top 1 percent wealth, they continually tell the public they will write laws to punish these same evil rich people themselves excluded, of course. This deception and purposeful division must end, argues first-time author James Lewis. Taxation without representation was only one of twenty-seven different grievances outlined by our Founding Fathers in the Declaration of Independence, but it is the one grievance which has become more egregious even with representation and is easily provable to anyone who is intellectually honest. It took our government less than four years to begin abusing their new income taxation power afforded them by the passage of the Sixteenth Amendment in 1913. Tax policies have changed many

times over the past 108 years radically at times from nominal single digit tax brackets to wealth crushing 94 percent top end tax brackets affecting only select groups of Americans all the while our politicians claim fairness Taxation with Representation A New Evil is a historical honest and constitutional look at United States tax policies their effects fairness and outcomes and lays bare who is responsible for the class warfare and division in America This book will actually define the middle class something most elected officials can t do reveal who is paying taxes and demonstrate not only the inherent unfairness of our current progressive tax system but offer solutions which will not only make the system truly fair but will ensure a bright future for our posterity There are many policy areas where we citizens can share respectful disagreements but truth and fairness in tax policy is not one of them
