Open AI and Computational Intelligence for Society 5.0 Pandey, Rajiv, Srivastava, Nidhi, Prasad, Rajesh, Prasad, Jayashree, Garcia, Manuel B., 2024-11-29 As technology rapidly advances, the complexity of societal challenges grows, necessitating intelligent solutions that can adapt and evolve. However, developing such solutions requires a deep understanding of computational intelligence (CI) and its application in addressing real-world problems. Moreover, ethical considerations surrounding AI, such as bias and accountability, are crucial to ensure responsible development and deployment of intelligent systems. *Open AI and Computational Intelligence for Society 5.0* offers a comprehensive exploration of CI, providing insights into intelligent systems theory, design, and application. This book is a practical guide for scientists, engineers, and researchers seeking to develop thoughtful solutions for complex societal issues. Integrating disruptive technologies and frameworks illuminates the path toward creating intelligent machines collaborating with humans to enhance problem solving and improve quality of life.

Ethics of Virtual Reality Michael J. Grabowski, 2024-12-15 In this book, Michael Grabowski draws on established theories of ethics to consider critical questions surrounding the growing adoption of virtual reality (VR) technologies. These questions include who should control and have access to VR, its impact on privacy, its potential for misrepresentation and bias, and how to provide a platform for free expression while mitigating harassment and abuse. Grabowski examines use cases of other digital technologies, including social media and artificial intelligence, to examine who is helped and harmed by the widespread implementation of VR and how it might transform existing institutions, social relationships, and communication. Finally, Grabowski forecasts the possible futures of VR and what limits, if any, should be placed on representing the real world or imagining new ones. Scholars of media studies, technology studies, communication, and ethics will find this book of particular interest.

Mind-Reading and Artificial Intelligence: Past, Present and Future Prof. (Dr.) Jai Paul Dudeja, 2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else's thoughts, feelings, or intentions. Mind Reading has two components: human-based and device-based artificial intelligence. Artificial Intelligence (AI) refers to programming computers to do tasks that normally require human intelligence, like learning, problem solving, and understanding language. It is like giving computers the ability to think and make decisions on their own, similar to how humans do. AI helps machines learn from data, adapt to new situations, and perform tasks without being explicitly programmed for each step. This book covers the topics on

human based and device based mind reading and interpretation artificial intelligence that is divided into 32 chapters and the following 8 sections i Mind Reading and Artificial Intelligence Introduction and Overview ii Human Based Mind Reading iii Artificial Intelligence Introduction Types of Learning iv Device Based Mind Reading And Virtual Assistants v Applications and Opportunities of Artificial Intelligence vi Artificial Intelligence Ethical Issues Risks and Regulations vii Artificial Consciousness and viii Artificial Intelligence in India Status and the Way Forward Generative AI, Contracts, Law and Design Marcelo Corrales Compagnucci,Helena Haapio,Mark Fenwick,2025-11-22 This book explores how generative AI and design are reshaping the law legal communication and contracting moving beyond automation toward collaboration and meaningful outcomes Combining theory and practice it addresses challenges such as privacy communication financial well being responsible AI use and the language of contracts This edited book breaks new ground in exploring how generative AI and design are acting as catalysts for change in law legal communication and contracting Together they are transforming the way we think and act moving beyond automation toward collaboration actionability and achieving goals Bringing together theoretical insights and practical experiments the book features contributions from scholars and practitioners working at the intersection of law business technology and design Chapters address topics such as AI enhanced financial well being and debt support bridging the implementation gap in contracting improving the usability of privacy communication and health data and protecting artistic style in the age of AI Threaded through these diverse contributions common questions emerge If the purpose of contracts is to establish and achieve common goals why does their language so often seem arcane like a magic spell and how can AI help us change that How can we responsibly integrate AI into legal health and commercial information to enhance usability and understanding What does responsible AI use look like in practice and how can design principles guide it This book provides legal professionals technologists designers business leaders and policymakers with the insight and tools necessary to shape the future of law and contracts creatively and critically The American Legion ,2001
