Reference Handbook Stephen F. Davis, William Buskist, 2008 Highlights the most important topics, issues, questions, and debates in the field of psychology. Provides material of interest for students from all corners of psychological studies, whether their interests be in the biological, cognitive, developmental, social, or clinical arenas.

Sexual Abuse Recalled Judith L. Alpert, 1995-12 Sexual Abuse Recalled: Treating Trauma in the Era of the Recovered Memory Debate provides clinical discussion and knowledge from state-of-the-art research in order to further the treatment of adult survivors of abuse. Mental health professionals will find this psychodynamically oriented book helpful when confronted with dilemmas, questions, or concerns about adults who may have been abused as children. While it is possible for memories of abuse that have been forgotten for decades to be remembered, it is also possible to construct pseudo memories for events that never actually occurred. Deciding which is the case as well as which of the remembered events approximate reality is often a complex task. This volume will be welcomed by mental health professionals seeking thoughtful guidance for their therapeutic work.

Diagnosis for Disaster Claudette Wassil-Grimm, 1995 False Memory Syndrome is a dangerous phenomenon that is gaining tremendous momentum in this country. Truth or Fantasy is a powerful look at this shocking trend. The book tells the story of this crisis through the voices of retractorists, psychiatrists, psychologists, and memory experts.

The Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions Fabiana Battista, Antonietta Curci, Ivan Mangiulli, Henry Otgaar, 2024-08-02 The fallibility of memory has been often demonstrated. A plethora of studies has focused on external influences that can affect memory reports, such as suggestive questioning. Adopting different paradigms, e.g., misinformation, memory conformity. The recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced, i.e., commission errors. False details. In addition, suggestion can make them unable to recall truly experienced events or event-related details. However, internal influences can also affect memory. One such internal influence is deception. In the last decade, several studies have investigated how memory can be affected by deception. Specifically, these studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event. This line of research examined the detrimental effects on memory by taking into account different strategies to deceive, e.g., false denials, feigned amnesia, and fabrication, and found that the memory outcomes due to deception can vary based on the strategy used to deceive. A number of studies has also demonstrated that another type of deception, known as self-deception, can influence our memory. This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories. The understanding of the effects of external, e.g., suggestion, and internal, e.g., deception, self-deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context. Memory distortions, for example, inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions. Several studies have underlined the

harmful consequences of distorted statements Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases for instance www.innocenceproject.org Therefore it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice *UFOs and Abductions* David Michael Jacobs,2000 Examining the nature of UFO evidence the authors present a primer for scholars skeptics and others uneasy about investigating the field of UFOs The volume also brings together three bestselling authors David M Jacobs Budd Hopkins and Pulitzer Prize winner John Mack widely known for their writings on the controversial alien abduction phenomenon *Controversial Issues in Social Work Practice* Bruce A. Thyer,1997 Part of the popular Controversial Issues series this paperback text presents a series of debates on the most current issues and topics in the area of social work practice This book will help students and instructors at every level to think through issues that may arise in everyday practice such as whether social workers should support the use of hypnosis whether repressed memory therapy should be relied upon whether clinical social workers should be licensed and more The format stimulates discussion and critical thinking and will help students appreciate some of the complex clinical as well as ethical issues that arise in practice and will encourage them to think through these issues for themselves **Reports of Cases Determined in the Supreme Court of the State of California** California.
