students professionals and practitioners in industry interested in developing maintaining and using advanced Web based systems and applications Universal Access in Human-Computer Interaction. Applications and Services Constantine Stephanidis, 2009-07-14 The 13th International Conference on Human Computer Interaction HCI International 2009 was held in San Diego California USA July 19 24 2009 jointly with the Symposium on Human Interface Japan 2009 the 8th International Conference on Engineering Psychology and Cognitive Ergonomics the 5th International Conference on Universal Access in Human Computer Interaction the Third International Conference on Virtual and Mixed Reality the Third International Conference on Internationalization Design and Global Development the Third International Conference on Online Communities and Social Computing the 5th International Conference on Augmented Cognition the Second International Conference on Digital Human Modeling and the First International Conference on Human Centered Design A total of 4 348 individuals from academia research institutes industry and governmental agencies from 73 countries submitted contributions and 1 397 papers that were judged to be of high scientific quality were included in the program These papers dress the latest research and development efforts and highlight the human aspects of the design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas **WEB ENGINEERING** Gerti Kappel, Brigit Proll, Siegfried Reich, Werner Retschitzegger, 2009-06-01 Market_Desc Undergraduate and graduate students on Computing and Internet related degrees web software developers web designers and project managers Special Features Defines an important new vocational discipline popular with students Offers teachers a viable alternative to teaching outmoded software engineering a market of 100 000 students Covers business aspects market drivers and site design reflecting interdisciplinary influences on web application development Complements existing technology oriented books with an engineering approach About The Book This book seeks to motivate students in this new discipline using concepts methods techniques and tools to demonstrate how to design implement and test web applications The book also demonstrates the distinctions between software engineering and web engineering The shorter lead times that Web Engineering has compared to its software counterpart whilst demonstrating the rapid prototyping and agile methods of development needed to meet these criteria Web Engineering also features a constant focus on interactivity with a far greater emphasis on multimedia than its software counterpart The book highlights the importance of the HCI and interface aspects of Web Engineering and their importance to the visual nature of the medium Yet the text also also highlights the need to examine and re use the body of knowledge found within Software Engineering This book demonstrates how to use that knowledge within the web environment in order to achieve a highly disciplined and methodical means of producing web based software **Handbook of Conceptual Modeling** David W. Embley, Bernhard Thalheim, 2012-04-23 Conceptual modeling is about describing the semantics of software applications at a high level of abstraction in terms of structure behavior and user interaction Embley and Thalheim

start with a manifesto stating that the dream of developing information systems strictly by conceptual modeling as expressed in the phrase the model is the code is becoming reality The subsequent contributions written by leading researchers in the field support the manifesto's assertions showing not only how to abstractly model complex information systems but also how to formalize abstract specifications in ways that let developers complete programming tasks within the conceptual model itself They are grouped into sections on programming with conceptual models structure modeling process modeling user interface modeling and special challenge areas such as conceptual geometric modeling information integration and biological conceptual modeling The Handbook of Conceptual Modeling collects in a single volume many of the best conceptual modeling ideas techniques and practices as well as the challenges that drive research in the field Thus it is much more than a traditional handbook for advanced professionals as it also provides both a firm foundation for the field of conceptual modeling and points researchers and graduate students towards interesting challenges and paths for how to contribute to this fundamental field of computer science

Hagenberg Research Bruno Buchberger, Michael Affenzeller, Alois Ferscha, Michael Haller, Tudor Jebelean, Erich Peter Klement, Peter Paule, Gustav Pomberger, Wolfgang Schreiner, Robert Stubenrauch, Roland Wagner, Gerhard Weiß, Wolfgang Windsteiger, 2009-05-29 Bruno Buchberger This book is a synopsis of basic and applied research done at the various research institutions of the Softwarepark Hagenberg in Austria Starting with 15 coworkers in my Research Institute for Symbolic Computation RISC I initiated the Softwarepark Hagenberg in 1987 on request of the Upper Austrian Government with the objective of creating a scientific technological and economic impulse for the region and the international community In the meantime in a joint effort the Softwarepark Hagenberg has grown to the current 2009 size of over 1000 R D employees and 1300 students in six research institutions 40 companies and 20 academic study programs on the bachelor master's and PhD level The goal of the Softwarepark Hagenberg is innovation of economy in one of the most important current technologies software It is the message of this book that this can only be achieved and guaranteed long term by watering the root namely emphasis on research both basic and applied In this book we summarize what has been achieved in terms of research in the various research institutions in the Softwarepark Hagenberg and what research vision we have for the imminent future When I founded the Softwarepark Hagenberg in addition to the watering the root principle I had the vision that such a technology park can only prosper if we realize the magic triangle i.e. the close interaction of research academic education and business applications at one site see Figure 1
