Model 905

Instructions

The Model 905 Parametric Equalizer offers a unique degree of equalization flexibility in a high-density format without sacrificing true, fully parametric operation of all three filter bands. The overlapping bands each offer control of frequency, bandwidth (Q), and up to 15 dB of reciprocal cut or boost to provide exact, complementary filter action for most equalization needs. For problem situations requiring the removal of spurious signals, each of the bands can be independently switched into "infinite notch" mode without affecting the operation of the others. In situations where a shelving equalizer will produce better results than a peaking one, the 905's high and low bands can be independently switched from peaking to shelving operation. The entire unit may be switch-by-passed for instant before/after comparisons. The 905 is the complete equalizer package right at your fingertips.

☐ Three bands of EQ in one package permit exceptional flexibility, allow precise shaping of frequency curve ☐ Each band has controls for reciprocal boost/cut (up to 15 dB), bandwidth (Q), and frequency center ☐ "Infinite" notch switch on each band lets you remove unwanted narrow-band signals without affecting adjacent frequency information ☐ Peak/shelf switch on high and low bands gives great flexibility in shaping the ends of the curve ☐ Panel layout allows easy access to all critical controls ☐ Multipoint overload sensing helps you eliminate clipping by showing when overload occurs at any point in the unit.
