Making Media Futures Phillip H. Roth, Ana María Guzmán Olmos, Alin Olteanu, Stefan Bösch, 2025-04-22 *Making Media Futures* offers a multi-perspectival exploration of how imaginaries and knowledge of the future are constructed in and through various media. The volume addresses the discursive dimensions of imaginaries and future visions as well as the impact of technological material and cultural conditions on the propagation of future discourses through media. Providing both theoretically detailed and empirically rich investigations, the contributions offer a wide range of cases spanning the century from the end of World War II until today and looking at examples from the Southern Hemisphere as well as the Global North. Bringing together scholars in media studies, science and technology studies, STS, and the history and philosophy of technology, the chapters discuss future visions and imaginations of quantum computing, the uncertainty and impact of AI-based text-to-image generation, the ideology behind 5G telecommunication standards, imaginaries of the Internet of Things, transmedia strategies in global and local climate protests, how broadcast radio was implicated in the evangelical mission imaginary, and how early visions of automating scholarly information management shaped standards and ideals of academia. The volume thus complements existing approaches and analytical frameworks for the study of imaginaries and futures discourses with perspectives that are sensitive to the plurality of media-specific conditions and technologies. The book will interest students and scholars working in media studies, STS, history, and philosophy, as well as at the intersection of engineering, humanities, and social sciences on matters such as sustainability, ethics, and responsible innovation. **c't**

Working with AI c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons, for example, you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally, and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training, and at work help to exploit opportunities and minimise risks. Humanising Technology: Reflections on Design, Ethics and Inclusion
