About this manual

Our aim

The aim of this manual is to help you get the best value from your vehicle. It can do this in several ways. It can help you decide what sort of use the car can make about you choose to get it done for it properly, provide information on engine maintenance and servicing, and give a regular course of action and diagnosis when certain faults occur. However, it is hoped that you will use the manual by looking for the work yourself. On simple jobs it may save the trouble that sending the car into a garage and paying more money, to have one called in. However, most important, it is if money can be saved by avoiding the costs of garage visit charges to cover the labour and materials.

The manual has drawings and descriptions to show the location of the various components so that their names can be understood. Then the parts are described and photographed in order to show exactly as they are in order not to do the work.

Our arrangement

The manual is divided into three Chapters, each covering a logical sub-division of the vehicle. The Chapters are: Chapter 1, the Systems, numbered with single figures, eg 1.1 and the Systems and components, can also be numbered, with chapter numbers following on from the figure. Thus we can 1.1.1, 1.1.2, 1.1.3, etc.

It is hoped, however, that you will find that there is a detailed sequence of operations to be carried out. These are in the form of illustrations, figures and photographs. The figures are numbered in

sequence with decimal numbers, according to their position in the Chapter — eg Fig. 1.1.1 is the first drawing (illustration) in Chapter 1. Photographs carry the same number (either individually or in related groups) as the figure or text section to which they refer.

There is an alphabetical index at the back of the manual as well as a contents list at the front. Each Chapter is also preceded by its own individual contents list.

References to the left or right of the vehicle are in the sense of a person in the driver's seat facing forward.

Unless otherwise stated, nuts and bolts are referred to having anti-rusteners, and ignored by having washers.

Various manufacturers continuously make changes to specifications and recommendations, and these will reflect all subsequent editions of this manual at the latest opportunity.

The text gives you the sequence of information given in this manual, but certain manufacturers make alterations and design changes during the production run of a particular vehicle of which they do not advise us. This liability can be accepted by the editors or publishers for loss, damage or injury caused by any error in, or omission from, the information given.
