The Wildfire Reader A Century Of Failed Forest Policy:

The Wildfire Reader George Wuerthner, 2006-08-04 The Wildfire Reader presents in an affordable paperback edition the essays included in Wildfire offering a concise overview of fire landscapes and the past century of forest policy that has affected them

This Land Christopher Ketcham, 2019-07-16 A big bold book about public lands The Desert Solitaire of our time Outside A hard hitting look at the battle now raging over the fate of the public lands in the American West and a plea for the protection of these last wild places The public lands of the western United States comprise some 450 million acres of grassland steppe land canyons forests and mountains It s an American commons and it is under assault as never before Journalist Christopher Ketcham has been documenting the confluence of commercial exploitation and governmental misconduct in this region for over a decade His revelatory book takes the reader on a journey across these last wild places to see how capitalism is killing our great commons Ketcham begins in Utah revealing the environmental destruction caused by unregulated public lands livestock grazing and exposing rampant malfeasance in the federal land management agencies who have been compromised by the profit driven livestock and energy interests they are supposed to regulate He then turns to the broad effects of those corrupt politics on wildlife He tracks the Department of Interior s failure to implement and enforce the Endangered Species Act including its stark betrayal of protections for the grizzly bear and the sage grouse and investigates the destructive behavior of U S Wildlife Services in their shocking mass slaughter of animals that threaten the livestock industry Along the way Ketcham talks with ecologists biologists botanists former government employees whistleblowers grassroots environmentalists and other citizens who are fighting to protect the public domain for future generations This Land is a colorful muckraking journey part Edward Abbey part Upton Sinclair exposing the rot in American politics that is rapidly leading to the sell out of our national heritage The book ends with Ketcham s vision of ecological restoration for the American West freeing the trampled denuded ecosystems from the effects of grazing enforcing the laws already in place to defend biodiversity allowing the native species of the West to recover under a fully implemented Endangered Species Act and establishing vast stretches of public land where there will be no development at all not even for recreation

The Bitterroot and Mr. Brandborg Frederick H Swanson, 2012-05-22 Meticulously written The Bitterroot and Mr Brandborg tells the story of Guy M Brandborg and his impact on the practices of the U S Forest Service It articulates Brandborg s Progressive era idealism and is based on extensive archival research in collections throughout the Rockies and the Northwest including the Brandborg family papers

Risk Analysis of Natural Hazards Paolo Gardoni, Colleen Murphy, Arden Rowell, 2015-10-17 This volume investigates the interdisciplinary and cross cutting challenges in the risk analysis of natural hazards It brings together leading minds in engineering science philosophy law and the social sciences Parts I and II of this volume explore risk assessment first by providing an overview of the interdisciplinary interactions involved in the assessment of natural hazards and then by exploring the particular impacts of climate change on natural

hazard assessment Part III discusses the theoretical frameworks for the evaluation of natural hazards Finally Parts IV and V address the risk management of natural hazards providing first an overview of the interdisciplinary interactions underlying natural hazard management and then exploring decision frameworks that can help decision makers integrate and respond to the complex relationships among natural events the built environment and human behavior

Working on Earth Christina Robertson, Jennifer Westerman, 2015-02-25 This collection of essays examines the relationship between environmental injustice and the exploitation of working class people Twelve scholars from the fields of environmental humanities and the humanistic social sciences explore connections between the current and unprecedented rise of environmental degradation economic inequality and widespread social injustice in the United States and Canada The authors challenge prevailing cultural narratives that separate ecological and human health from the impacts of modern industrial capitalism Essay themes range from how human survival is linked to nature to how the use and abuse of nature benefit the wealthy elite at the expense of working class people and the working poor as well as how climate change will affect cultures deeply rooted in the land Ultimately *Working on Earth* calls for a working class ecology as an integral part of achieving just and sustainable human development

The Rebirth of Environmentalism Douglas Bevington, 2009-09-22 Over the past two decades a select group of small but highly effective grassroots organizations have achieved remarkable success in protecting endangered species and forests in the United States *The Rebirth of Environmentalism* tells for the first time the story of these grassroots biodiversity groups Author Douglas Bevington offers engaging case studies of three of the most influential biodiversity protection campaigns the Headwaters Forest campaign the zero cut campaign on national forests and the endangered species litigation campaign exemplified by the Center for Biological Diversity providing the reader with an in depth understanding of the experience of being involved in grassroots activism Based on first person interviews with key activists in these campaigns the author explores the role of tactics strategy funding organization movement culture and political conditions in shaping the influence of the groups He also examines the challenging relationship between radicals and moderate groups within the environmental movement and addresses how grassroots organizations were able to overcome constraints that had limited the advocacy of other environmental organizations Filled with inspiring stories of activists groups and campaigns that most readers will not have encountered before *The Rebirth of Environmentalism* explores how grassroots biodiversity groups have had such a big impact despite their scant resources and presents valuable lessons that can help the environmental movement as a whole as

well as other social movements become more effective Book Jacket New Geographies of the American West William Riebsame Travis, 2007-05-11 Examines contemporary land use changes and development patterns from the Mississippi to the Pacific and assesses the ecological and social outcomes of Western development This work suggests that functional and attractive settlement can be embedded in preserved lands working landscapes and healthy ecologies *Qué pasa* ,2008 *American Book Publishing Record* ,2005 Landscape Architecture ,2001 **Fire Management in the American West** Mark Hudson, 2011-10-01 Most journalists and academics attribute the rise of wildfires in the western United States to the USDA Forest Service s successful fire elimination policies of the twentieth century However in *Fire Management in the American West* Mark Hudson argues that although a century of suppression did indeed increase the hazard of wildfire the responsibility does not lie with the USFS alone The roots are found in the Forest Service s relationships with other more powerful elements of society the timber industry in particular Drawing on correspondence both between and within the Forest Service and the major timber industry associations newspaper articles articles from industry outlets and policy documents from the late 1800s through the present Hudson shows how the US forest industry under the constraint of profitability pushed the USFS away from private industry regulation and toward fire exclusion eventually changing national forest policy into little more than fire policy More recently the USFS has attempted to move beyond the policy of complete fire suppression Interviews with public land managers in the Pacific Northwest shed light on the sources of the agency s struggles as it attempts to change the way we understand and relate to fire in the West *Fire Management in the American West* will be of great interest to environmentalists sociologists fire managers scientists and academics and students in environmental history and forestry **Books Out-of-print** ,1980 **Living with Fire** Sara E. Jensen, Guy R. McPherson, 2008-08-04 Fire both inevitable and ubiquitous plays a crucial role in North American ecosystems But as necessary as fire is to maintaining healthy ecosystems it threatens human lives and livelihoods in unacceptable ways This volume explores the rich yet largely uncharted terrain at the intersection of fire policy fire science and fire management in order to find better ways of addressing this pressing dilemma Written in clear language it will help scientists policy makers and the general public especially residents of fire prone areas better understand where we are today in regard to coping with wildfires how we got here and where we need to go Drawing on abundant historical and analytic information to shed new light on current controversies *Living with Fire* offers a dynamic new paradigm for coping with fire that recognizes its critical environmental role The book also tells how we can rebuild the important ecological and political processes that are necessary for finding better ways to cope with fire and with other complex policy dilemmas *Wildfire Policy* Dean Lueck, Karen M. Bradshaw, 2013-06-17 During the five decades since its origin law and economics has provided an influential framework for addressing a wide array of areas of law ranging from judicial behaviour to contracts This book will reflect the first ever forum for law and economics scholars to apply the analysis and methodologies of their field to the subject of wildfire The only

modern legal work on wildfire the book brings together leading scholars to consider questions such as How can public policy address the effects of climate change on wildfire and wildfire on climate change Are the environmental and fiscal costs of ex ante prevention measures justified What are the appropriate levels of prevention and suppression responsibility borne by private state and federal actors Can tort liability provide a solution for realigning the grossly distorted incentives that currently exist for private landowners and government firefighters Do the existing incentives in wildfire institutions provide incentives for efficient private and collective action and how might they be improved

Issues in Evaluating the Costs and Benefits of Fuel Treatments to Reduce Wildfire in the Nation's Forests (Classic Reprint) Jeffrey D. Kline, 2017-11-12 Excerpt from Issues in Evaluating the Costs and Benefits of Fuel Treatments to Reduce Wildfire in the Nation's Forests For much of the 20th century Wildland fire suppression was a major component of federal forest policy Since the late 1960s and early 1970s recognition of the natural role of fire in ecosystem processes as well as mounting fire suppression expenditures gradually led to an easing of the fire suppression mandate refocusing forest policy to consider fire by prescription subordinate to broader landscape objectives pyne Restoring fire to ecosystems after decades of fire suppression poses many challenges owing to long term changes in the structure and composition of plant communities as well as increased presence of people's homes and other structures near forests hourdequin 2001 Parsons Any restoration path we choose for a given landscape defines a particular ecological trajectory characterized by a flow of goods and services accruing from the natural capital inherent in healthy ecosystems science and Policy Working Group 2002 Ecosystem restoration decisions ultimately are economic decisions whereby society evaluates the utility of different management alternatives including inaction weigand and Haynes Embarking on one particular management and policy alternative necessarily carries costs associated with other opportunities that are foregone Although fuel treatments undoubtedly can be used to alter forest structure and modify wildfire behavior and severity graham and others to date there has been little scientific evidence demonstrating whether fuel treatments make economic sense About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Forests Under Fire Christopher J. Huggard, Arthur R. Gomez, 2001-03 A collection of writings on the environmental crisis of the Southwestern forests by historians specializing in either the environment or the Southwest criticizing forest management practices devoted to exploiting the forest for timber grazing and recreation with insufficient regard for ecological balance
