Metaphysics is the branch of philosophy concerned with the nature of existence being and the world Arguably metaphysics is the foundation of philosophy Aristotle calls it the first philosophy or sometimes just the wisdom and says it is the subject that deals with the first causes and the principles of things. It asks questions like: What is the nature of reality? How does the world exist and what is its origin or source of creation? Does the world exist outside the mind? How can the incorporeal mind affect the physical body? If things exist what is their objective nature? Is there a God or many gods or no god at all? Originally the Greek word *metaphysika* literally after physics merely indicated that part of Aristotle's oeuvre which came in its sequence after those chapters which dealt with physics. Later it was misinterpreted by Medieval commentators on the classical texts as that which is above or beyond the physical and so over time metaphysics has effectively become the study of that which transcends physics. This book provides a detailed resume of current knowledge about the Metaphysics
