Associated Press     *The Truth Machine* Geoffrey C. Bunn, 2012-06-01 How do you trap someone in a lie For centuries all manner of truth seekers have used the lie detector In this eye opening book Geoffrey C Bunn unpacks the history of this device and explores the interesting and often surprising connection between technology and popular culture Lie detectors and other truth telling machines are deeply embedded in everyday American life Well known brands such as Isuzu Pepsi Cola and Snapple have advertised their products with the help of the truth machine and the device has also appeared in countless movies and television shows The Charles Lindbergh crime of the century in 1935 first brought lie detectors to the public's attention Since then they have factored into the Anita Hill Clarence Thomas sexual harassment controversy the Oklahoma City and Atlanta Olympics bombings and one of the most infamous criminal cases in modern memory the O J Simpson murder trial The use of the lie detector in these instances brings up many intriguing questions that Bunn addresses How did the lie detector become so important Who uses it How reliable are its results Bunn reveals just how difficult it is to answer this last question A lie detector expert concluded that O J Simpson was one hundred percent lying in a video recording in which he proclaimed his innocence a tabloid newspaper subjected the same recording to a second round of evaluation which determined Simpson to be absolutely truthful Bunn finds fascinating the lie detector's ability to straddle the realms of serious science and sheer fantasy He examines how the machine emerged as a technology of truth transporting readers back to the obscure origins of criminology itself ultimately concluding that the lie detector owes as much to popular culture as it does to factual science

**The Truth Machines** Jinee Lokaneeta,2020-02-26 Using case studies and the results of extensive fieldwork this book considers the nature of state power and legal violence in liberal democracies by focusing on the interaction between law science and policing in India The postcolonial Indian police have often been accused of using torture in both routine and exceptional criminal cases but they and forensic psychologists have claimed that lie detectors brain scans and narcoanalysis

the use of truth serum Sodium Pentothal represent a paradigm shift away from physical torture most state high courts in India have upheld this rationale The Truth Machines examines the emergence and use of these three scientific techniques to analyze two primary themes First the book questions whether existing theoretical frameworks for understanding state power and legal violence are adequate to explain constant innovations of the state Second it explores the workings of law science and policing in the everyday context to generate a theory of state power and legal violence challenging the monolithic frameworks about this relationship based on a study of both state and non state actors Jinee Lokaneeta argues that the attempt to replace physical torture with truth machines in India fails because it relies on a confessional paradigm that is contiguous with torture Her work also provides insights into a police institution that is founded and refounded in its everyday interactions between state and non state actors Theorizing a concept of Contingent State this book demonstrates the disaggregated and decentered nature of state power and legal violence creating possible sites of critique and intervention
