The Medical Library Association Guide to Providing Consumer and Patient Health Information Michele Spatz, 2014-05-01 Comprised of fifteen chapters written by experienced consumer health librarians, The Medical Library Association Guide to Providing Consumer and Patient Health Information is designed for library and information science graduate students as well as librarians new to health and medical librarianship, regardless of library setting. It is comprehensive in scope, covering all aspects of consumer and patient health and medical information from their humble grassroots beginnings to the ever-evolving applications of new technology and social media. In between the mundane aspects of health and medical librarianship, such as needs assessment, costs, budgeting, and funding, and staffing, are discussed. Adding richness to this discussion are the coverage of more sensitive topics such as patient friendly technology, ethical issues in providing consumer and patient health information, meeting the needs of diverse populations, and responding to individuals from various cultural backgrounds. No comprehensive picture of consumer and patient health librarianship would be complete without addressing the critical importance of marketing and strategic partnerships, such discussions round out this invaluable guide. Patients today must be knowledgeable enough to participate in their health and well-being. Shorter hospital stays, changing reimbursement patterns, and the gradual shift towards focusing on proactively maintaining health and managing disease require patients to be informed and actively engaged. Education, information, and understanding are important components of actively engaged patients. Correspondingly, in today's world, there is a glut of information.
