The Metaphysics Of Evolution:

The Metaphysics of Evolution David L. Hull, 1989-01-01 This critical collection of essays represents the best of the best when it comes to philosophy of biology Many chapters treat evolution as a biological phenomenon but the author is more generally concerned with science itself Present day science particularly current views on systematics and biological evolution are investigated The aspects of these sciences that are relevant to the general analysis of selection processes are presented and they also serve to exemplify the general characteristics exhibited by science since its inception

The Metaphysics of Evolution Chad Ripperger, 2012-08 In his encyclical *Humani Generis* Pope Pius XII stressed the importance of preserving the traditional Catholic approach to philosophy In his work *The Metaphysics of Evolution* Fr Chad Ripperger demonstrates that the theory of evolution is incompatible with the metaphysics of the Catholic tradition

The Metaphysics of Evolution Thomas Whittaker, 1926 The Metaphysics of Evolution Thomas WHITTAKER (Philosophical Writer.), 1926 **The Metaphysics of Evolution** Thomas Whittaker, 1928 The Metaphysics of Evolution, Etc Thomas WHITTAKER (Philosophical Writer.), 1928 *The Metaphysics of Evolution with Other Essays New and Republished by Thomas Whittaker*

Thomas Whittaker, **The Implications of Evolution for Metaphysics** David H. Gordon, 2023-08-22 After the nineteenth century turn from idealism when idealist philosophies were largely abandoned for materialist ones many analytic philosophers have adhered to scientific naturalism as the new orthodoxy largely due to the success of scientific advancements The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind first world view In *The Implications of Evolution for Metaphysics* Theism Idealism and Naturalism David H Gordon explores questions such as Is it true that evolution is incompatible with theism and necessarily results in naturalism Is it possible as naturalism maintains that everything can be reduced to physical processes Or are there too many recalcitrant phenomena that defy reduction Can the epistemological conditions for metaphysical knowledge be met If the underdetermination of theory allows for multiple metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power

Essence in the Age of Evolution Christopher J. Austin, 2018-10-10 This book offers a novel defence of a highly contested philosophical position biological natural kind essentialism This theory is routinely and explicitly rejected for its purported inability to be explicated in the context of contemporary biological science and its supposed incompatibility with the process and progress of evolution by natural selection Christopher J Austin challenges these objections and in conjunction with contemporary scientific advancements within the field of evolutionary developmental biology the book utilises a contemporary neo Aristotelian metaphysics of dispositional properties or causal powers to provide a theory of essentialism centred on the developmental architecture of organisms and its role in the evolutionary process By defending a novel theory

of Aristotelian biological natural kind essentialism Essence in the Age of Evolution represents the fresh and exciting union of cutting edge philosophical insight and scientific knowledge **Cosmic Evolution and the Evolution of Life** Subir Bijoy Sengupta,1982 **Metaphysics and the Origin of Species** Michael T. Ghiselin,1997-01-01 In explaining his individuality

thesis Michael T Ghiselin provides extended discussions of such philosophical topics as definition the reality of various kinds of groups and how we classify traits and processes He develops and applies the implications for general biology and other sciences and makes the case that a better understanding of species and of classification in general puts biologists and paleontologists in a much better position to understand nature in general and such processes as extinction in particular

Evolution's Purpose Steve McIntosh,2012-10 Presents the author s view of the scientific story of our evolutionary origins to show how evolution s progressive generation of emergent value reveals a larger purpose within the process He demonstrates how this purpose can be felt within each of us as the evolutionary impulse to make things better to grow toward ever widening realizations of beauty truth and goodness Provided by publisher *The Princeton Review* ,1881

The Homiletic Monthly ,1884 *Riddles of the Sphinx* Ferdinand Canning Scott Schiller,1910 **The New Princeton Review** ,1886 Includes index [International Journal of Ethics](#) ,1928 Includes section Book reviews [The Metaphysics of Biology](#) John Dupré,2021-06-03 This Element is an introduction to the metaphysics of biology a very general account of the nature of the living world The first part of the Element addresses more traditionally philosophical questions whether biological systems are reducible to the properties of their physical parts causation and laws of nature substantialist and processualist accounts of life and the nature of biological kinds The second half will offer an understanding of important biological entities drawing on the earlier discussions This division should not be taken too seriously however the topics in both parts are deeply interconnected Although this does not claim to be a scientific work it does aim to be firmly grounded in our best scientific knowledge it is an exercise in naturalistic metaphysics Its most distinctive feature is that argues throughout for a view of living systems as processes rather than things or in the technical philosophical sense substances
