**Workforce Readiness** Harold F. O'Neil, Jr.,Harold F. O'Neil,2014-03-05 Current economic difficulties and the challenge of competing in the world market have necessitated a rethinking of American approaches to the utilization of people in organizations Management now recognizes a need to have workers take on more responsibility at the points of production of sale and of service rendered if the United States is to compete in rapidly changing world markets This development means that much more is expected of even entry level members of the American workforce Thus even more is expected of our high schools and colleges to provide this type of workforce The need of American management for workers with greater skills and who can take on greater responsibility has spawned many commissions task forces and studies All of them have contributed to the vast evidence documenting the need for a more highly skilled workforce These studies are summarized and synthesized in this book However what remains largely undone is the development of methods to assess the necessary skills that have been identified A major portion of this book deals with assessment issues Workforce Readiness Competencies and Assessment explores the state of the art in the specification of competencies skills and their assessment for students entering the world of work from both high school and college Both individual and team competencies are examined via data that has been reported and collected in various settings schools laboratories and industrial facilities     Resources in Education ,1998

**Analysis of Math Skills and Math Curriculum at St. Anthony High School in Milwaukee, in Relationship to the ACT WorkKeys Applied Mathematics Assessment** Albana Kume-Robertson,2016 In the U S many employees who enter the workforce after graduating from high school do not possess the basic math skills required for employment and promotion Juniors in high school take ACT WorkKeys Applied Mathematics assessment to demonstrate their readiness for the workplace

However the overall scores of this test do not indicate which specific math skills students are lacking. This study had the purpose to analyze the math skills mastered by 58 junior students at St Anthony High School in Milwaukee using a practice test modelled after the ACT WorkKeys Applied Mathematics exam and to identify any gaps in the math skill levels assessed by this exam with the math curriculum taught at St Anthony High School utilizing curriculum mapping. The curriculum mapping did not reveal gaps between the math skills taught and the math skills assessed by ACT WorkKeys Applied Mathematics exam but scores on the practice test showed that participating students lacked many of the basic math skills required for successful employment. Study recommendations include addressing math curriculum areas that need to be taught differently to prepare students in skills they are lacking and actions to raise awareness about the importance of math skills in the workplace. **Psychological Testing and Assessment** Lewis R. Aiken, 1997 The aim of this textbook is to help students understand the construction and use of tests in psychological educational and employment settings. The goal is to make psychological testing and assessment an interesting and important field of study. This revision not only updates information throughout the text but also strengthens the coverage of several key issues such as the methodological aspects of testing and the research on and theories of intelligence. Also greater emphasis has been placed on applications of psychological testing in education, clinical and industrial organizational settings.
