Systems Analysis And Design Methods 5e:

Systems Analysis and Design Methods Jeffrey L. Whitten, Lonnie D. Bentley, Kevin C. Dittman, 2000 This text is designed for the systems analysis and design course usually taught at the sophomore junior senior and graduate levels to both information systems and business majors The authors have consciously kept a fine balance between the presentation of concepts and the support of those concepts through the practice of techniques and their application to systems development The text is written with a lively conversational tone which works well with a wide variety of students A running integrated case demonstrates concepts and techniques by tying the material together at the appropriate level of complexity *Systems Analysis and Design Methods, 5th Edition* Jeffery L. Whitten, 2002-01-01 Today's students want to practice the application of concepts not just study applications of concepts As with the previous editions of this book the authors wrote it to 1 balance the coverage of concepts tools techniques and their applications 2 provide the most examples of system analysis and design deliverables available in any book and 3 balance the coverage of classical methods such as structured analysis and information engineering and emerging methods e g object oriented analysis and rapid application development **XIV**
