resources in institutions of higher education we grapple with how priorities are to be set for the limited resources available
Most vulnerable are those students labeled underprepared by colleges and universities Should we argue that the limited
resources available ought to be used to support these students through their undergraduate years And if we decide that we
want to do that what evidence of their potential for success can we provide that will justify the use of these resources
Through longitudinal research that follows students who have been so labeled over all their college years we can begin to
find answers to these questions *Time to Know Them* is the first book that follows the experiences of a group of students over
their entire academic experience No previous studies have brought together the factors incorporated in this study examining
writing and learning on a true longitudinal basis studying a multicultural urban population investigating the relationship
between writing and learning by examining papers written over time for regularly assigned academic courses across a range
of disciplines and taking into consideration non academic factors that influence academic performance such as race gender
socio economic status and ideological orientation Through interviews twice a semester over six years the collection of papers
written for all courses observations of instructional settings and analysis of required institutional tests of writing the author
has been able to pull together a more complete picture of writing and intellectual development over the college years than
has previously been available in any study Students are seen to acquire the ability to handle more complex reasoning tasks as
they find themselves in more challenging intellectual settings and where risk taking and exploration of new ideas are valued
The integration of students previous life experiences into their academic studies allows them to analyze critique modify and
apply their previously held world views to their new learning These changes are seen to occur over time with instructional
settings and support providing key roles in writing development Personal factors in students lives present difficulties that
