Three Seductive Ideas:

Three Seductive Ideas Jerome Kagan, 2000-04-07 Do the first two years of life really determine a child's future development? Are human beings like other primates only motivated by pleasure? And do people actually have stable traits like intelligence, fear, anxiety, and temperament? This book, the product of a lifetime of research by one of the founders of developmental psychology, takes on the powerful assumptions behind these questions and proves them mistaken. Ranging with impressive ease from cultural history to philosophy to psychological research literature, Jerome Kagan weaves an argument that will rock the social sciences and the foundations of public policy. Scientists as well as lay people tend to think of abstract processes like intelligence or fear as measurable entities of which someone might have more or less. This approach in Kagan's analysis shows a blindness to the power of context and to the great variability within any individual subject to different emotions and circumstances. Infant determinism is another widespread and dearly held conviction that Kagan contests. This theory with its claim that early relationships determine lifelong patterns underestimates human resiliency and adaptiveness both emotional and cognitive and of course fails to account for the happy products of miserable childhoods and vice versa. The last of Kagan's targets is the vastly overrated pleasure principle which he argues can hardly make sense of unselfish behavior impelled by the desire for virtue and self-respect, the wish to do the right thing. Written in a lively style that uses fables and fairy tales, history and science to make philosophical points, this book challenges some of our most cherished notions about human nature.

Child Development Jean Mercer, 2010 With its emphasis on critical thinking about child development, Mercer's text is unique and timely. Mercer has done an admirable job in selecting and tackling the topics that she does. Nancy Dye, Humboldt College. A wonderful way to look more deeply into issues in child development. Sarah Jane Anderson, Mount Ida College. In *Child Development Myths and Misunderstandings*, intriguing vignettes and questions about children and families encourage readers to think critically about the logic of common beliefs and about the implications of relevant psychological research. It reviews 51 common beliefs or myths about child development and discusses their logic and whether there is good research evidence to support them. Readers can use *Child Development Myths and Misunderstandings* to learn how to tell child development facts from child development myths on their own in the classroom or in association with distance learning courses.

Thinking Critically About Child Development Jean Mercer, Stephen D. A. Hupp, Jeremy Jewell, 2019-02-12 With a unique focus on inquiry, *Thinking Critically About Child Development* presents 74 claims related to child development for readers to examine and think through critically. Author Jean Mercer and new co-authors Stephen Hupp and Jeremy Jewell use anecdotes to illustrate common errors of critical thinking and encourage students to consider evidence and logic relevant to everyday beliefs. New material in the Fourth Edition covers adolescence, adverse childhood experiences, genetics, LGBT issues for both parents and children, and other issues about sexuality, keeping readers up to date on the latest scholarship in the field.
