Waiting For Rain The Politics And Poetry Of Drought In Northeast Brazil:

Waiting for Rain Nicholas Gabriel Arons, 2004-10 Drawing on interviews with artists and poets and on his own experiences in the Brazilian Northeast Arons has written an account of how drought has impacted the region's culture. He intertwines ecological social and political issues with the words of some of Brazil's most prominent authors and folk poets to show how themes surrounding drought hunger migration endurance nostalgia for the land have become deeply embedded in Nordeste identity. Through this tapestry of sources Arons shows that what is often thought of as a natural phenomenon is actually the result of centuries of social inequality political corruption and unsustainable land use. **BOOK JACKET**

Technocrats and the Politics of Drought and Development in Twentieth-Century Brazil Eve E.

Buckley, 2017-09-11 Eve E Buckley's study of twentieth century Brazil examines the nation's hard social realities through the history of science focusing on the use of technology and engineering as vexed instruments of reform and economic development. Nowhere was the tension between technocratic optimism and entrenched inequality more evident than in the drought ridden Northeast sertão plagued by chronic poverty recurrent famine and mass migrations. Buckley reveals how the physicians engineers agronomists and mid level technocrats working for federal agencies to combat drought were pressured by politicians to seek out a technological magic bullet that would both end poverty and obviate the need for land redistribution to redress long standing injustices. Scientists planned and oversaw huge projects including dam construction irrigation for small farmers and public health initiatives. They were Buckley shows sincerely determined to solve the drought crisis and improve the lot of poor people in the sertão. Over time however they came to the frustrating realization that despite technology's tantalizing promise of an apolitical means to end poverty political collisions among competing stakeholders were inevitable. Buckley's revelations about technocratic hubris the unexpected consequences of environmental engineering and constraints on scientists as agents of social change resonate with today's hopes that science and technology can solve society's most pressing dilemmas including climate change.

Grassroots Development, 2004 *Brazilian Agricultural Development, 1890-1950* Earl Richard Downes, 2025-02-08 This book provides a comprehensive history of Brazilian agricultural economic development between 1890 and 1950. It details the US agricultural education that made an impact on Brazil and how this translated into private capital in the US. The book highlights the shifting priorities of Brazil's regional elites during the First Republic and takes readers through its downfall in 1930. Chapters cover how US educators implanted the philosophy and practices of US agricultural education at the nation's three most prominent university level institutes of agronomist education. The history also documents the activist role played by the United States in the agricultural development of Brazil during an early part of the century which was before the US was a world leader economically. Earl Richard Downes provides detailed documentation of the creation of the major agricultural education institutions in Brazil and their initial contributions to Brazil's agricultural development. He also provides insight into the Brazilian federal government
