Thallita G. L. Lima, 2026-01-01 This book examines how algorithms are reshaping security and criminal justice revealing their profound social and political implications From intelligence agencies and police forces to courtrooms tools like facial recognition are redefining how security is imagined and enacted worldwide Yet alongside promises of efficiency and objectivity these systems frequently fail exposing tensions around their epistemic authority and legitimacy Focusing on biometric data and cases like Clearview AI in the United States the book unpacks the entanglements between security professionals legal actors and algorithmic systems showing how these technologies gain stability even amid errors and disputes Drawing on Critical Security Studies Science and Technology Studies and feminist critiques of technoscience it offers a multidimensional analysis of algorithmic reason its narratives of better justice or enhanced security and the ethical and political challenges they generate A vital resource for scholars practitioners policymakers and anyone concerned with the societal impacts of emerging technologies *Building Multimodal Generative AI and Agentic Applications* Indrajit Kar, 2025-10-27 DESCRIPTION Generative AI and agentic AI are reshaping how we interact with data enabling intelligent systems that can reason generate and autonomously act across

multiple modalities From text and images to voice and structured data these technologies are increasingly essential in enterprise and research applications today This book offers a complete roadmap to mastering multimodal generative AI and agentic AI systems It covers foundational concepts vision language models retrieval augmented generation human in the loop and multi agent workflows text to SQL OCR and hybrid AI integrations Each chapter combines theory practical guidance code implementations and real world case studies helping readers understand architectures pipelines and production grade deployments By the end of this book readers will be capable of designing implementing and scaling robust multimodal and agentic AI systems They will gain hands on expertise in reasoning generation retrieval agent orchestration and Ops equipping them to build production ready AI applications and excel in their roles

WHAT YOU WILL LEARN Understand multimodal generative AI and agentic AI systems Architecting RAG vector DBs embeddings cross encoders and core agentic planning Build retrieval augmented generation workflows efficiently Implement human in the loop and multi agent pipelines Apply text to SQL for real time data queries Develop OCR solutions for images and documents Integrate traditional ML models with GenAI workflows Deploy production grade AI with monitoring and observability

WHO THIS BOOK IS FOR This book is for AI enthusiasts data scientists ML engineers and software developers with foundational Python and ML knowledge It is ideal for tech leads researchers and enterprise architects aiming to build and scale multimodal production grade agentic AI systems

EU Policy and Legal Framework for Artificial Intelligence, Robotics and Related Technologies - The AI Act Nikos Th. Nikolinakos,2023-07-06 Artificial Intelligence AI can benefit our society and economy but also brings with it new challenges and raises legal and ethical questions According to the author of this comprehensive analysis it is imperative to ensure that AI is developed and applied in an appropriate legal and regulatory framework that promotes innovation and investment and at the same time addresses the risks associated with certain uses of AI related technologies Essential to understanding the relationship between policy and law this book traces the evolution of EU policy on artificial intelligence and robotics focusing in particular on the EU s ethical framework for AI which defines trust as a

prerequisite for ensuring a human centric approach The main part of the book provides a thorough and systematic analysis of the Commission's 2021 proposed AI Act which establishes harmonised rules for the development, placement on the market and use of AI systems in the EU The author painstakingly compares the Commission's proposed AI Act with the numerous compromise proposals of the Council of the European Union leading to the final version of the Council's AI Act general approach and its formal adoption on 6 December 2022 The author also examines with extraordinary detail the amendments proposed by the relevant committees and political groups of the European Parliament revealing the position the Parliament is likely to adopt in the forthcoming negotiations with the Commission and the Council on the text of the AI Act Numerous legislative and policy documents are presented in detail while the analysis also considers the comments made by all interested parties e.g. the European Commission Council of the European Union European Parliament governmental organisations national competent authorities and stakeholders actors with different conflicting interests such as corporations business and consumer associations civil society and other non-profit organisations In the course of its in-depth analysis this book will provide readers with crucial insight into the reasons behind the European Institutions' different approaches and the often contradictory interests of stakeholders Because the policy arguments are carefully balanced and drafted with scrupulous care this volume will establish itself as a reference resource to be consulted for years to come [Outline](#)
