*Closing the Care Gap with Wearable Devices* Michael Davis, Michael Kirwan, Walter Maclay, Harry Pappas, 2022-12-07  
Patient focused healthcare driven by COVID 19 experiences has become a hallmark for providing healthcare services to patients across all modalities of care and in the home. The ability to capture real time patient data no matter the location via remote patient monitoring and to transmit that data to providers and organizations approved by the consumer patient will become a critical capability for all healthcare providers. Of all the remote patient monitoring product designs wearable medical devices are emerging as the best positioned to support the evolving patient focused healthcare environment. This book is for those who are evaluating, selecting, implementing, managing, or designing wearable devices to monitor the health of patients and consumers. This book will provide the knowledge to understand the issues that mitigate the risk of wearable technologies so people can deliver successful projects using these technologies. It will discuss their use in remote patient monitoring, the advantages and disadvantages of different types of physiological sensors, different wireless communication protocols, and different power sources. It will describe issues and solutions in cybersecurity and HIPAA compliance as well as setting them up to be used in healthcare systems and by patients.

*Emerging Thoughts in Disability and Humanness* Elizabeth DePoy, Stephen French Gilson, 2022-03-01  
*Emerging Thoughts in Disability and Humanness* examines the role of embodied disablement in providing an important but often circumvented analysis of the explicit and implicit nature of the legitimate human body. Its symbolism and responses that such bodies elicit from diverse local through global social and cultural entities. Beyond simply theorizing, this work begins to unearth a potent and in-depth examination of membership meaning and social valuation on the basis of embodied features that include desirables in and exclude offending bodies from membership in the category of human. It invokes contemporary post-postmodernist marriages of varied disciplines as frameworks for returning creative substance into rethinking disability as part of the fabric of humanness.
