**Look Who's Watching, Revised Edition** Fen Osler Hampson, Eric Jardine, 2017-11-08 The Internet ecosystem is held together by a surprisingly intangible glue trust. To meet its full potential users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking while also being secure, private and safe. When trust in the Internet wanes, the network's stock of digital social capital falls and users begin to alter their online behaviour. These often subtle changes in behaviour tend to be collectively highly maladaptive, hindering the economic developmental and innovative potential of the globe spanning network of networks. *Look Who's Watching: Surveillance, Treachery and Trust* Online confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced. Edward Snowden's revelations that the United States National Security Agency and other government agencies are spying on Internet users, the proliferation of cybercrime and the growing commodification of user data and regulatory changes which threaten to fragment the system are all rapidly eroding the confidence users have in the Internet ecosystem. Based on a combination of illustrative anecdotal evidence and analysis of new survey data, *Look Who's Watching* clearly demonstrates why trust matters, how it is being eroded and how with care and deliberate policy action the essential glue of the Internet can be restored.

**Streampunks** Robert Kyncl, Maany Peyvan, 2017-09-05 An entertainment and tech insider YouTube's chief business officer delivers the first detailed account of the rise of YouTube, the creative minds who have capitalized on it to become pop culture stars and how streaming video is revolutionizing the media world. In the past ten years, the internet video platform YouTube has changed media and entertainment as profoundly as the invention of film, radio and television did more than six decades earlier. *Streampunks* is a firsthand account of this upstart company, examining how it evolved and where it will take us next. Sharing behind the scenes stories of YouTube's most influential stars, Streampunks like Tyler Oakley, Lilly Singh and Casey Neistat, and the dealmakers brokering the future of entertainment like Scooter Braun and Shane Smith. Robert Kyncl uses his experiences at three of the most innovative media companies, HBO, Netflix and YouTube, to tell the story of streaming video and this modern pop culture juggernaut. Collaborating with Google speechwriter Maany Peyvan, Kyncl explains how the new rules of entertainment are being written and how and why the media landscape is radically changing while giving aspiring Streampunks some necessary advice to launch their own new media careers. Kyncl persuasively argues that despite concerns about technology impoverishing artists or undermining artistic quality, the new media revolution is actually fueling a creative boom and leading to more compelling, diverse and immersive content. *Enlightening, surprising and thoroughly entertaining, Streampunks is a revelatory ride through the new media rebellion that is reshaping our world.*
