Surrogacy Law And Human Rights:

Surrogacy, Law and Human Rights Paula Gerber, Katie O'Byrne, 2016-03-03 Surrogacy presents particularly complex questions for human rights law and theory. This book provides a unique and insightful examination into the underexplored issues of how domestic and international law is responding to the sharp increase in the use of surrogacy. The work presents critical analysis of the current regulation of surrogacy via domestic law in Australia, India and the USA and international law in the form of the UN Convention on the Rights of the Child. Including a wide range of views from academics and practitioners around the world the contributors consider what could be done to further protect the rights of all persons involved in surrogacy arrangements. This in depth study of the international and domestic law governing surrogacy provides much needed scholarly knowledge of this contemporary phenomenon along with recommendations for improvement, regulation and reform. The book will be of great importance to human rights and legal scholars and well as practitioners in this field.

Surrogacy, Law and Human Rights Katie O'Byrne, 2015 **Surrogacy Law and Human Rights** Katie O'Byrne, 2015-07 *Future Directions in Surrogacy Law* Kirsty Horsey, Zaina Mahmoud, Katherine Wade, 2025-03-27 This edited collection brings together a range of experts on surrogacy at a time when the law in the UK has been fully reconsidered for the first time in generations. Society has developed significantly since surrogacy laws were first written and the existing law is out of date and no longer fit for purpose. Each chapter in this collection considers one aspect of surrogacy regulation and analyses the potential effectiveness of proposed reforms or suggests what changes should be made based on experience in other jurisdictions. This is an unprecedented contribution to the public and regulatory debate on surrogacy.

Reassembling Motherhood Yasmine Ergas, Jane Jenson, Sonya Michel, 2017-10-10 The word mother traditionally meant a woman who bears and nurtures a child. In recent decades changes in social norms and public policy as well as advances in reproductive technologies and the development of markets for procreation and care have radically expanded definitions of motherhood. But while maternity has become a matter of choice for more women the freedom to make reproductive decisions is unevenly distributed. Restrictive policies, socioeconomic disadvantages, cultural mores and discrimination force some women into motherhood and prevent others from caring for their children. Reassembling Motherhood brings together contributors from across the disciplines to consider the transformation of motherhood as both an identity and a role. It examines how the processes of bearing and rearing a child are being restructured as reproductive labor and care work change around the globe. The authors examine issues such as artificial reproductive technologies, surrogacy, fetal ultrasounds, adoption, nonparental care and the legal status of kinship showing how complex chains of procreation and childcare have simultaneously generated greater liberty and new forms of constraint. Emphasizing the tension between the liberalization of

procreation and care on the one hand and the limits to their democratization due to race class and global inequality on the other the book highlights debates that have emerged as these multifaceted changes have led to both the fragmentation and reassembling of motherhood Comparative Legal Frameworks for Pre-Implantation Embryonic Genetic Interventions Pin Lean Lau,2019-08-01 This book discusses the possibilities for the use of international human rights law and specifically international biomedical laws related to the protection of human rights and the human genome to provide a guiding framework for the future regulation of genetic modifications applied to human embryos and other precursor materials when these are made with the aim of implanting a genetically altered embryo in a woman The significance and timeliness of the work derives from the recent availability of CRISPR Cas9 and other gene editing tools and from lacunae in international law regarding the legality of embryo modification with these tools and appropriate governance structures for the oversight of resulting practices The emergence of improved genome editing tools like CRISPR Cas9 holds the promise of eradicating genetic diseases in the near future But its possible future applications with Pre Implantation Genetic Diagnosis PGD raises a plethora of legal and ethical concerns about remaking future human beings The work aims to address an urgent call to embed these rising concerns about biomedical advancements into the fundamental tailoring of legal systems Suitable regulatory approaches coupled with careful reflection of global biomedical laws and individual constitutional systems must be explored The Book analyzes the impact of reproductive biomedical technologies on the legal and ethical dimensions of regulatory frameworks in selected constitutional systems like the US the UK Australia Malaysia and Thailand Employing a comparative law methodology the work reveals a dynamic intersection between legal cultures socio philosophical reasoning and the development of a human rights based framework in bio political studies Navigating towards a truly internationalized biomedical approach to emerging technologies it presents an understanding why a renegotiation and reinvigoration of a contemporary and new universal shared values system in the international human rights discourse is now necessary

Sokołowski, Agnieszka Wedeł-Domaradzka, Olga Bobrzyńska, Dita Frintová, Ondřej Frinta, Janusz Gajda, Rafał Łukasiewicz, Elena Júdová, Martin Píry, Wojciech Lis, Piotr Telusiewicz, Michał Wojewoda, Edyta Figura-Góralczyk, Radosław Flejszar, Piotr Rodziewicz, Konrad Burdziak, Łukasz Pohl, Wojciech Górowski, Agnieszka Laber, Dominik Zając, Karolina Sęk, 2019-07-01 The observation that *mater semper certa est* remains accurate under most legal systems in the world. Maternity is defined as the personal status filiation of a woman who gave birth to a child. It is typically complemented by the fatherhood of the man from whom the child biologically originates often *quem nuptiae demonstrant*. However in some states a kind of competitive way of acquiring the legal status of mother and father or homosexual parents A and B has been introduced via concluding a contract with a surrogate mother. Usually with a woman coming from poorer societies and with the assistance of professional intermediaries and organizers. The postulates to change substantive family law or at least to recognize the effects of foreign law and procedures a kind of procreative tourism appear nowadays also in states generally prohibiting surrogate motherhood. The issues discussed in this volume concern both national law and international court cases. Recent examples include the opinion of the European Court of Human Rights of 10 April 2019 initiated by the French Cour de cassation the judgement of the German Bundesgerichtshof of 20 March 2019 and dilemmas of Polish administrative courts. Focusing on the international perspective the present volume as well as an accompanying book in Polish are the results of the international cooperation of over 30 experts from both member states and observer states of the Council of Europe. The monograph is structured from the general to the detail and includes a comprehensive view as well from the issues of philosophy and sociology of law to human rights standards of national constitutions and international agreements to principles of *ordre public* of forum and their protection with measures of private public and penal law. This allows readers including legislators and judges the better understanding of the fundamental legal problems that surrogate motherhood brings both in states where law creates them in a narrower or wider extent and in other countries of the world to which these problems can be imported with the movement of people and with *de lege lata* and *de lege ferenda* postulates.

Status of Children Arising from Inter-country Surrogacy Arrangements Michael Wells-Greco, 2016 Through a comparative review of eight legal systems this book examines the legal aspects of parenthood and nationality following inter country surrogacy arrangements and the influence of European and international human rights law on the determination of parentage the establishment of nationality and the prevention of statelessness as well as identity rights continuation of relationship rights and more broadly child protection. The research considers whether national laws on parenthood and the establishment of nationality sufficiently protect the interests of the surrogate born child as well as the parties to a surrogacy arrangement in accordance with identifiable standards under European and international human rights law. Soft law and hard law recommendations are provided to protect the interests of these children.
