The Unfinished Queer Agenda After Marriage Equality Angela Jones, Joseph DeFilippis, Michael Yarbrough, 2018-04-17 While legal recognition of marriage has met the needs of a segment of the LGBTQ population many still face daily struggles with issues around housing education healthcare policing and incarceration and immigration These are issues that were largely eclipsed in national arenas by the fight for marriage equality In reaction to this The Unfinished Queer Agenda After Marriage Equality examines the institutional failings and overlapping systems of injustice that continue to dehumanize queer and trans people and deprive them of basic human rights Building on a major conference held in 2016 entitled After Marriage The Future of LGBTQ Politics and Scholarship the editors have collected academic papers edited transcripts of selected conference sessions and interviews with activists Drawing from this source material the book argues that any queer agenda should be informed by an understanding that the issues facing queer and trans people come from the combined influence of neo liberal capitalism global white supremacy and heterosexism The authors argue that these modes of oppression continue to be especially damaging for poor people undocumented people people of color non binary trans and queer people By taking an in depth look at the myriad social issues that continue to affect LGBTQ communities and by exposing systemic prejudices and inequality as the root cause this title is an important intervention for students and researchers engaged with queer and trans activism beyond the fight for marriage equality

Genome Generation Elizabeth Finkel, 2012-01-01 The year 2001 marked more than just the beginning of Stanley Kubrick's Space Odyssey it marked the beginning of the genome era That was the year scientists first read the 3 billion letters of DNA that make up the human genome This was followed by a veritable Noah's Ark of genomes sponges and worms dogs and cows rice and wheat chimps and elephants 180 creatures aboard so far So what have we learned from all this How has it changed the way we practise medicine grow crops and breed livestock What have we learned about evolution

These are the questions science writer and molecular biologist Elizabeth Finkel asked herself four years ago To find the answers she travelled the science frontier from Botswana to Boston from Warracknabeal to Mexico and tracked down scientists working in the field Their stories told here paint the picture of what it means to be part of the genome generation The Genome Generation is absolutely riveting These tales from the frontier are a must read for everyone who wishes to understand our past the logic of evolution or take a peep into our exciting future at the creation of super plants through digital agriculture R A Mashelkar CSIR Bhatnagar Fellow and India President Global Research Alliance **Ending the HIV Epidemic** Steven Petrow,Pat Franks,Timothy R.
